PROPOSED REGULATION UNDER
THE OCCUPATIONAL HEALTH AND SAFETY
ACT, 1978

**COKE OVEN EMISSIONS—DESIGNATED
SUBSTANCE**

1. In this Regulation,
- (a) “coke oven emissions” mean, the benzene
soluble fraction of total particulate matter
(BSFTPM) of the substances emitted into the
atmosphere from metallurgical coke ovens
including condensed vapours and solid par-
ticulates;
 - (b) “metallurgical coke ovens” mean a coke oven
battery, including topside and its machinery,
coke side and its machinery, the battery
ends, wharf and the screening station;
 - (c) “mg” means milligrams;
 - (d) “m³” means cubic metre.

2. Coke oven emissions are prescribed as desig-
nated substances.

3. This Regulation applies to every employer of a
worker who works at or upon metallurgical coke ovens
and who is likely to be exposed to coke oven emissions
and to such worker.

4.—(1) Every employer shall take all necessary
measures and procedures by means of engineering
controls, work practices and hygiene practices and
facilities to ensure that the time-weighted average
exposure of a worker to coke oven emissions shall not
exceed 0.15 mg coke oven emissions per m³ of air.

(2) Subject to section 5, every employer shall com-
ply with subsection 1 without requiring a worker to
wear and use respiratory equipment.

(3) The time-weighted average exposure of a
worker to coke oven emissions shall be calculated in
accordance with Schedule 1 and as calculated shall be
prima facie evidence of the exposure.

(4) Where an employer has taken all steps reasonable in the circumstances to require a worker to work in compliance with necessary measures and procedures that are work practices and hygiene practices as prescribed by subsection 1, the employer does not contravene subsection 1 in respect of a worker who fails to work in compliance therewith.

5.—(1) For the purposes of complying with the exposure limit prescribed in section 4 respiratory equipment shall be provided by an employer to be used by a worker only,

(a) where the measures and procedures required to control the exposure of a worker to coke oven emissions as prescribed by section 4,

(i) do not exist or are unavailable,

(ii) are unreasonable or unpractical for the length of time or frequency of exposure or the nature of the process, operation or work, or

(iii) are ineffective because of a temporary breakdown of equipment; or

(b) in an emergency.

(2) Where the concentrations of coke oven emissions to which a worker is exposed do not exceed the limits prescribed by section 4, an employer may,

(a) at the request of a worker provide the worker with respiratory equipment;

(b) provide a worker with respiratory equipment to be used by the worker as required by the employer.

(3) Where respiratory equipment is provided by an employer and used by a worker the respiratory equipment shall be appropriate in the circumstances for the type and the concentration of coke oven emissions and shall meet or exceed the requirements set out in the Code for Respiratory Equipment for Coke Oven Emissions dated the 1st day of May, 1981, and issued by the Ministry.

(4) The employer shall provide training and instruction to a worker in the proper care and use of respiratory equipment provided by the employer.

6.—(1) Every employer to whom this Regulation applies shall cause an assessment to be made in writing of the exposure or likelihood of exposure of a worker to coke oven emissions.

(2) In causing the assessment to be made, the employer shall consider and take into account such matters as,

(a) the methods and procedures used or to be used in the metallurgical coking operations;

(b) the extent and potential extent of the exposure of a worker to coke oven emissions; and

(c) the measures and procedures necessary to control such exposure by means of engineering controls, work practices and hygiene practices and facilities.

(3) In causing the assessment to be made, the employer shall consult thereon with the joint health and safety committee required to be established under clause *b* of subsection 2 of section 8 of the Act, the committee of like nature or the workers or their representatives who participate in an arrangement, program or system conforming to subsection 2 of section 8 of the Act as the case may be, and the committee or the workers or their representatives may make recommendations with respect to the assessment.

(4) A copy of the assessment made by an employer shall be given by the employer to each member of the joint health and safety committee or committee of like nature and to the workers or their representatives participating in an arrangement, program or system conforming to subsection 2 of section 8 of the Act.

7.—(1) Where the assessment discloses or would disclose if made in conformity with section 6, that a worker is likely to be exposed to coke oven emissions and that the health of the worker may be affected thereby, the employer shall develop, establish, put into effect and maintain measures and procedures to control the exposure of the worker to coke oven emissions and shall incorporate the same into a coke oven emissions control program.

(2) The coke oven emissions control program shall include provisions for,

(a) engineering controls, work practices, and hygiene practices and facilities to include those set forth in Schedule 2 to control the exposure of a worker to coke oven emissions;

(b) methods and procedures to monitor the concentrations of airborne coke oven emissions at the metallurgical coke ovens every three months and the exposure of a worker thereto;

(c) personal records of the exposure of a worker to coke oven emissions to be maintained by the employer;

(d) medical examinations and clinical tests of a worker;

(e) records of medical examinations and clinical tests of a worker to be maintained by a physician who has examined the worker or under whose direction the clinical tests have been performed;

(f) a formal training program for supervisors and workers on the health effects of coke oven emissions and the measures and procedures required under the coke oven emission control program;

(g) personal protective clothing and equipment as required by the work; and

- (h) adequate eating, changing and washing facilities to minimize exposure to coke oven emissions.

(3) In developing the measures and procedures mentioned in subsection 1 and the coke oven emission control program, the employer shall consult with the joint health and safety committee, the committee of like nature or the workers or their representatives mentioned in subsection 3 of section 6 who may make recommendations with respect to the same.

8.—(1) Where respiratory equipment is permitted to be provided by the employer to be used by a worker under subclause i or ii of clause *a* of subsection 5 (1) the employer shall evaluate, adopt and implement measures and procedures by way of engineering controls as they come into existence, become available or are reasonable or practical to reduce the exposure of a worker to the maximum exposure limit prescribed.

(2) Where a change is made in metallurgical coking operations and the change could result in a significant difference in the exposure of a worker to coke oven emissions, the employer shall cause a further assessment to be made forthwith and the provisions of sections 6 and 7 apply.

9.—(1) Where disputes arise between an employer and a joint health and safety committee, a committee of like nature or the workers or their representatives who participate in an arrangement, program or system conforming to subsection 2 of section 8 of the Act as to an assessment required under section 6 or 8 or as to the measures and procedures mentioned in subsection 1 of section 7 or the coke oven emissions control program or its provisions required under section 7 or 8, the employer, a member of the joint health and safety committee or the committee of like nature or the workers or their representatives may notify an inspector thereof who shall investigate and give a decision in writing to the employer, the committee, or the workers or their representatives.

(2) Nothing in subsection 1 applies to affect the power of an inspector to issue an order for a contravention of any section of this Regulation.

10.—(1) A copy of the coke oven emissions control program put into effect by the employer shall be given by the employer to each member of the joint health and safety committee or committee of like nature and to the workers or their representatives participating in an arrangement, program or system conforming to subsection 2 of section 8 of the Act and the employer shall acquaint every worker affected by the coke oven emissions control program with its provisions.

(2) The coke oven emissions control program put into effect by the employer shall be made available by the employer in English and in the majority language of the work place.

11. Subject to section 17, the procedure for monitoring, sampling and determining the concentrations of coke oven emissions and the exposure of a worker thereto shall be those set out in the Code for

Measuring Coke Oven Emissions dated the 1st day of May, 1981 and issued by the Ministry.

12. The results of monitoring for coke oven emissions shall be,

- (a) posted forthwith by the employer as soon as the results are available in a conspicuous place or places at the work place where they are most likely to come to the attention of the workers affected thereby for a period of at least fourteen days;
- (b) furnished to the joint health and safety committee, committee of like nature or the workers or their representatives who participate in an arrangement, plan or program mentioned in subsection 3 of section 6; and
- (c) kept by the employer for a period of at least five years.

13.—(1) Medical examinations and clinical tests as the coke oven emissions control program provides shall be carried out at the expense of the employer.

(2) The medical examinations and clinical tests required to be provided in a coke oven emissions control program shall make provisions for,

- (a) pre-employment and pre-placement medical examinations to include,
 - (i) a medical history,
 - (ii) a physical examination, and
 - (iii) clinical tests as required by the examining physician; and
- (b) periodic medical examinations and clinical tests consisting of the items prescribed by clause *a*.

(3) The medical history, physical examination, and clinical tests shall meet the provisions of the Code for Medical Surveillance for Coke Oven Emissions dated the 1st day of May, 1981, and issued by the Ministry.

14.—(1) The records of the exposures of each worker to coke oven emissions to be maintained under the coke oven emissions control program shall identify the worker, including his date of birth, his jobs or occupations at the work place, the results of monitoring for exposure to airborne coke oven emissions in his work area and the use by the worker of respiratory equipment and its type.

(2) The employer shall provide a copy of the records of the exposure of the worker to coke oven emissions to the physician who examines the worker and under whose supervision the clinical tests of the worker are performed.

15.—(1) The records of medical examinations and clinical tests of a worker obtained and made under this Regulation and of the exposures of the worker to coke

oven emissions furnished by the employer under subsection 2 of section 14 shall be kept in a secure place by the physician who has conducted the examinations and tests or under whose supervision the examinations and tests have been made for,

- (a) a period of forty years from the time such records were first made; or
- (b) a period of twenty years from the time the last of such records were made,

whichever is the longer.

(2) Where the physician is no longer able or willing to keep the records, the records shall be forwarded to the Chief Physician, Occupational Health Medical Service of the Ministry, or a physician designated by the Chief Physician and the provisions of subsection 1 shall, with necessary modifications, apply.

16.—(1) The physician conducting the physical examination or clinical tests or under whose supervision the examination or tests are made shall advise the employer and the worker whether the worker is fit, or because of a condition resulting from exposure to coke oven emissions is fit with limitations or unfit without giving or disclosing to the employer the records or results of the examination or tests.

(2) Copies of the records and results of physical examinations and clinical tests of a worker shall be given to the worker or his physician by the physician conducting the examinations or tests upon the request in writing of the worker or, in the case of a deceased worker, of his nearest next of kin, and any authorization of another person by the worker or his nearest next of kin to obtain and receive such copies is of no effect.

(3) Where the physician advises the employer that a worker, because of a condition resulting from exposure to coke oven emissions, is fit with limitations or is unfit the physician shall forthwith communicate such advice to the Chief Physician, Occupational Health Medical Service of the Ministry.

17. For the purposes of this Regulation the methods and procedures that may be used or adopted may vary from the Codes issued by the Ministry if the protection afforded thereby or the factors of accuracy and precision used or adopted are equal to or exceed the protection or the factors of accuracy and precision in the Codes issued by the Ministry.

18.—(1) This Regulation, except sections 4, 5, 7, 8 and 10 to 17 comes into force on a day this Regulation is filed.

(2) Sections 4, 5, 7, 8 and 10 to 17 come into force ninety days after the day this Regulation is filed.

Schedule 1

The time-weighted average exposure of a worker to coke oven emissions shall be calculated as follows:

1. The average concentrations of coke oven emissions to which a worker is exposed shall be determined from analyses of air samples representative of the exposure of the worker to coke oven emissions during work operations as set out in the Code mentioned in section 11.
2. The results of the analyses are the concentrations expressed as BSFTPM of coke oven emissions in mg per m³ of air.
3. The concentrations shall be multiplied by the time in hours to which the worker is taken to be exposed to such concentrations.
4. The weekly exposure shall be calculated as follows:

$$C_1T_1 + C_2T_2 + \dots + C_nT_n = \text{cumulative weekly exposure, where } C_1 \text{ is the concentration found in an air sample and } T_1 \text{ is the total time in hours to which the worker is taken to be exposed to concentration } C_1 \text{ in a week.}$$
5. The time-weighted average exposure shall be calculated by dividing the cumulative weekly exposure by 40.

NOTICE IS HEREBY GIVEN that The Corporation of the City of London will apply to the Legislative Assembly of the Province of Ontario at its present session for an Act:

THE ENVIRONMENTAL ASSESSMENT
ACT, 1975

O. Reg. 256/81.
Exemption—City of Toronto—TOR-2.
Made—April 2nd, 1981.
Filed—April 30th, 1981.

ORDER MADE UNDER
THE ENVIRONMENTAL ASSESSMENT
ACT, 1975

EXEMPTION—CITY OF TORONTO—TOR-2

Having received a request from The Corporation of the City of Toronto that an undertaking, namely:

The activity of refurbishing of accommodation at the St. Lawrence Centre for the Performing Arts by the renovation of the interior and certain modifications to the exterior of the theatre including the addition of two levels of office space,

be exempt from the application of the Act pursuant to section 30; and

Having been advised that if the undertaking is subject to the application of the Act, the following injury, damage or interference with the persons and property indicated will occur:

- A. The major user of the main theatre, Toronto Arts Productions, requires that the renovated theatre be ready in time for the September 1982 theatre season and its activity in planning and producing theatrical performances for that season would be severely interfered with if the work is not completed by that date. In addition, if the theatre is not ready for use by that date, many jobs for actors, actresses and support staff will be affected for a further season. As well, the refurbishing is to be carried out with financial assistance from the City of Toronto, the Province of Ontario and the Government of Canada.

Having weighed such injury, damage, or interference against the betterment of the people of the whole or any part of Ontario by the protection, conservation

and wise management in Ontario of the environment which would result from the undertaking being subject to the application of the Act;

The undersigned is of the opinion that it is in the public interest to order and orders that the undertaking is exempt from the application of the Act for the following reasons:

- A. Plans have been made to close the main theatre from June, 1981 to September, 1982, so that the refurbishing work can be done. It is essential that if the time restrictions are to be met, the plans must be finalized and tenders called for and awarded by May, 1981;
- B. The effects on the environment of the proposed activity would appear to be minimal and to be generally positive in nature. Having regard to the nature and magnitude of the work, it appears that no useful purpose would be served by requiring the submission of an environmental assessment because the benefits of requiring an assessment do not appear to outweigh the damage which would be suffered by The Corporation of the City of Toronto, the St. Lawrence Centre for the Performing Arts and Toronto Arts Productions if an environmental assessment were required to be submitted.

This exemption is subject to the following terms and conditions:

1. The undertaking shall be carried out and completed by September 30, 1982. O. Reg. 256/81.

THE ENVIRONMENTAL ASSESSMENT ACT, 1975

O. Reg. 257/81.

Exemption—Ministry of Transportation
and Communications—MTC-39.

Made—April 9th, 1981.

Filed—April 30th, 1981.

ORDER MADE UNDER THE ENVIRONMENTAL ASSESSMENT ACT, 1975

EXEMPTION—MINISTRY OF TRANSPORTATION AND COMMUNICATIONS—MTC-39

Having received a request from the Minister of Transportation and Communications that an undertaking, namely:

The construction of a joint storm sewer system and open channel running northeasterly from a point 550 feet west of the point of intersection of the proposed Highway 427 and proposed Finch Avenue, immediately north of Finch Avenue and terminating at the Humber River, being an action required by the future construction of Finch Avenue from Highway 427 to Steeles Avenue, which is part of the Highway 427 project from Rexdale Boulevard to north of the Humber River,

be exempt from the application of the Act pursuant to Section 30; and

Having been advised that if the undertaking is subject to the application of the Act, the following damage or interference with the persons indicated will occur:

- A. Finery Investments Limited, having entered into an agreement in principle with the Ministry of Transportation and Communications to participate in the construction of a joint storm sewer system, would be damaged and interfered with by delays in the commencement of subdivision services presently scheduled for the spring of 1981 and by incurring additional engineering costs for the design of alternative storm sewer systems, which could be caused or made necessary by the application of the Act to the undertaking; and
- B. The Ministry of Transportation and Communications and the public will be damaged and interfered with by the need to design and construct a more costly and larger independent storm sewer system to a greater depth, an action which would be required to avoid physical conflicts with Finery Investments' alternate plans linking their development with Mississauga's present storm sewer system which they would be required to implement as a result of delays associated with the application of the Act to this undertaking.

Having weighed such damage, or interference against the betterment of the people of the whole or any part of Ontario by the protection, conservation and wise management in Ontario of the environment which would result from the undertaking being subject to the application of the Act;

The undersigned is of the opinion that it is in the public interest to order and orders that the undertaking is exempt from the application of the Act for the following reasons:

- A. The exemption of this undertaking will permit a joint storm sewer system design to proceed, this being the most cost-effective design both for the Ministry of Transportation and Communications and Finery Investments;

- B. The protection, conservation and wise management of the environment which will be provided for by the environmental planning and construction procedures already being used by the Ministry of Transportation and Communications will ensure that the undertaking has minimal adverse effects on the environment; and
- C. The joint storm sewer design has been reviewed by the Metropolitan Toronto Region Conservation Authority and they have approved of it.

This exemption is subject to the following terms and conditions:

1. Completion of the undertaking shall in no way prejudice the design and construction of the Highway 427 project, an undertaking which shall remain subject to the provisions of the *Environmental Assessment Act*.
2. The Environmental Approvals Branch of the Ministry of the Environment shall be provided with a copy of the plans and specifications for the undertaking at least 15 days prior to commencement of construction.
3. That tenders for construction of the undertaking shall be let no later than July 31, 1981.

Minister of the Environment

THE ENVIRONMENTAL ASSESSMENT ACT, 1975

O. Reg. 284/81.

Exemption—Ministry of Natural
Resources—MNR-11/3.

Made—April 2nd, 1981.

Approved—April 2nd, 1981.

Filed—May 7th, 1981.

ORDER MADE UNDER THE ENVIRONMENTAL ASSESSMENT ACT, 1975

EXEMPTION—MINISTRY OF NATURAL RESOURCES—MNR-11/3

Having received a request from the Minister of Natural Resources that an undertaking, namely:

The management by the Ministry of Natural Resources of Crown land presently included within forest management units,

be exempt from the application of the Act for an additional period pursuant to Section 30; and

Having been advised that if the undertaking is subject to the application of the Act, the following injury, damage or interference with the persons indicated will occur:

The Crown and the public will be interfered with by the delay in planning and implementing of forest management plans which are scheduled to proceed within the period of the exemption.

Having weighed such injury, damage, or interference against the betterment of the people of the whole or any part of Ontario by the protection, conservation and wise management in Ontario of the environment which would result from the undertaking being subject to the application of the Act;

The undersigned is of the opinion that it is in the public interest to order and orders that the undertaking is exempt from the application of the Act for the following reasons:

- A. The Ministry of Natural Resources requires additional time to establish and evaluate refined benefit cost figures resulting from the application of possible guidelines derived from an environmental assessment of the undertaking;
- B. The Ministry of Natural Resources has submitted a draft of the class environmental assessment to the Ministry of the Environment and will undertake measures to implement those guidelines of the class environmental assessment for public participation in respect to the approval of Forest Management Plans and Operating Plans, including road plans prescribed by these, and in respect to aerial spraying of herbicides and insecticides for forest management purposes;
- C. The undertaking is an on-going activity of the Ministry of Natural Resources and is an integral part of the economy of the Province. Since the exemption for this undertaking under Exemption Order MNR-11/2 published in THE ONTARIO GAZETTE on the 19th day of December, 1979 has expired, the application of the Act before December 31, 1982 in the absence of an approval under the Act would result in the halting of forest management on Crown land. Therefore, the interference which would be caused would be undue.

This exemption is subject to the following terms and conditions:

1. The Ministry of Natural Resources or its agent shall solicit input and comments from the public and government agencies at an early stage of the preparation of Forest Management Plans and Operating Plans, as well as thirty days prior to the proposed plan being submitted for approval for implementation.
2. The first solicitation under Condition 1 does not apply to those plans commenced prior to the effective date of this order.
3. The Ministry of Natural Resources shall develop a procedure to solicit, evaluate and respond to input and comments from the public and government agencies at an early stage of the preparation of Forest Management Plans and Operating Plans for Crown and Company Management Units. This procedure shall be included as part of the class environmental assessment to be submitted for the Activity of Forest Management on Crown land in Ontario for approval under the Act, and will also be incorporated into the forest management planning process.
4. For the period that this exemption order is in force, the Ministry of Natural Resources shall plan primary public forest access roads on Crown Management Units in accordance with the draft class environmental assessment for "Access Roads to MNR Facilities" on a trial basis. This procedure shall give emphasis to the identification of alternative road locations, the environmental effects of alternatives considered and an evaluation of the rationale for the selection of road location.
5. The Ministry of Natural Resources shall submit a class environmental assessment of the Forest Management Undertaking for formal review under the Act not later than March 31, 1982.
6. At least thirty days prior to the anticipated spraying of herbicides or insecticides for forest management purposes, the Ministry of Natural Resources shall notify the public and the appropriate Regional Office of the Ministry of the Environment of the project. During this period the Project Description shall be made available for public inspection at the appropriate District Office of the Ministry of Natural Resources. Where there is a newspaper or radio or television station serving the area concerned, the Public Notice shall be in the form of a paid public notice in one or more of such media. An illustrative format which may be used for a printed notice is attached as Schedule A.
7. The Ministry of Natural Resources shall prepare a letter for each plan prepared pursuant

to this exemption and send it to the Director of the Environmental Approvals Branch, Ministry of the Environment for inclusion in the Public Record. The letter shall describe:

- (a) the area covered by the plan;
- (b) the duration of the plan;
- (c) the date of the public notification;
- (d) the nature of the comments received from the public and the government agencies; and
- (e) the proponent's responses to the comments received.

This shall be submitted when the final solicitation under Condition 1 is commenced.

8. Conditions 1 to 7 of this exemption order shall not apply to those plans of the forest management undertaking which are under review for approval prior to the effective date of this order.
9. The Ministry of Natural Resources shall provide the Director of the Environmental Approvals Branch of the Ministry of the Environment with a list of those plans referred to in Conditions 2 and 8 and those plans scheduled for approval during the period of this order.
10. Where the carrying out of the undertaking requires that some activity for which an environmental assessment has been done and an approval to proceed received be conducted, that activity shall be carried out in accordance with the environmental assessment and approval to proceed.
11. This order expires on the earlier date of December 31, 1982 or the granting of an approval under the Act for the forest management undertaking. O. Reg. 284/81.

THE ENVIRONMENTAL ASSESSMENT ACT, 1975

O. Reg. 285/81.

Exemption—Ontario Northland Transporta-
Commission—MNA-4.

Made—April 2nd, 1981.

Approved—April 2nd, 1981.

Filed—May 7th, 1981.

ORDER MADE UNDER THE ENVIRONMENTAL ASSESSMENT ACT, 1975

EXEMPTION—ONTARIO NORTHLAND TRANSPORTATION COMMISSION—MNA-4.

Having received a request from the Ontario Northland Transportation Commission (ONTC), a public body reporting to the Minister of Northern Affairs, that an undertaking, namely:

The activity of carrying out that portion of ONTC's program of construction and provision of those matters listed in Condition 1,

be exempt from the application of the Act pursuant to
O. Reg. 284/81, Sched. A.

Having been advised that if the undertaking is subject to the application of the Act, the following injury, damage or interference with the persons and property indicated will occur:

- A. The public will be interfered with and damaged by the delay and expense incurred to prepare and process Environmental Assessments for projects which tend to have little or no detrimental effects on the environment.

Having weighed such injury, damage, or interference against the betterment of the people of the whole or any part of Ontario by the protection, conservation and wise management in Ontario of the environment which would result from the undertaking being subject to the application of the Act;

The undersigned is of the opinion that it is in the public interest to order and orders that the undertaking is exempt from the application of the Act for the following reasons:

- A. The undertaking is unlikely to have any significant adverse effects on the environment, and, therefor, the interference with ONTC's programs as described, which would be caused by the application of the Act, would be undue;
- B. This order is for the purpose of replacing order MTCI-9, dated October 14, 1976 and published in THE ONTARIO GAZETTE, dated November 13, 1976, as the description of the undertaking listed in the previous order omitted certain items which are now included herein; and for the purpose of clarification of other items exempted under that order.

This exemption is subject to the following terms and conditions:

1. The undertaking consists of:

Construction Activities

- (a) New, expanded or extended public or private sidings and minor track additions, including yard trackage alterations;
- (b) Construction or right-of-way buildings such as bunkhouses, toolhouses, yard buildings, and maintenance storage sheds, usually occurring on existing ONTC property or right-of-way;
- (c) Cable line activities—burial or elevation of communications cable lines;
- (d) Provision of passenger service facilities such as bus bays, bus stopping lanes or shelters;
- (e) Improvements or modifications to existing transportation terminal facilities, such as rail stations, or bus terminals, including paving and resurfacing parking lots, shelters amenities, signing, illumination and fencing, but not including expansions;
- (f) Restoration or replacement of ONTC facilities which have been destroyed as a result of the occurrence of a disaster or catastrophic failure provided the user capacity of the previous facility is not substantially changed.

Operations

- (g) Service and operational changes in existing transportation routes such as rail main/branch lines, truck routes on public roads, bus routes, air and marine services;

- (h) New or expanded air services between existing airports where no new construction is required to accommodate changes;
- (i) New or expanded inter-city bus routes on public roads;
- (j) New or expanded inter-city truck routes on public roads;
- (k) Acquisition of new and replacement equipment such as:
 - rolling stock (cars, trucks)
 - general equipment and machinery associated with the operation of bus, rail, trucking, airline, ferry and telecommunications services;
- (l) Upgrading and expansion of communications equipment. This is generally contained within existing structures and no construction is involved;
- (m) Temporary transportation services to special events on non-regular routes;
- (n) Temporary modal change for existing services;
- (o) Leasing of storage and minor servicing facilities already being used for similar or compatible uses;
- (p) Non-project related property disposition or transfer.

Maintenance

- (q) Projects such as the provision or modification of lighting, fencing, signals or barriers related to public safety.

2. *Definition of Terms*

In condition one, the following definitions of terms apply:

- (a) OPERATION CHANGES refers to minor changes in, for example, routings and yard procedures to correct such operational deficiencies as out of the way travel and forced standing time. Also included are relocation of such facilities as bus stops to reduce travel time and to better accommodate passenger pick-up and drop-off, changes to track utilization to improve the co-ordination of train movements, system changes that occur as part of bringing a new plant or rolling stock on stream, and temporary detours;
- (b) EXTENSION refers to the extension of an existing service to presently unserved areas,

without an increase of the level of service to the presently serviced area; and

- (c) EXPANSION refers to an increase of capacity of a facility or service which does not require the acquisition of additional property;
- (d) SERVICE CHANGES refers to short or long term changes which occur in response to fluctuations in demand for service. These may include schedule changes, short turns, skip stops, temporary service to special events, etc.;
- (e) MINOR TRACK ADDITIONS are additional short lengths of track to provide for localized operation efficiencies. These would permit, for example, run-through movements (i.e. would remove the need for shunting, which is time-consuming and costly) and provide bypass siding which is a relatively inexpensive alternative to an additional continuous track;
- (f) MODIFICATION refers to the re-arrangement of such things as storage and maintenance facilities both indoor and outdoor and within existing buildings and yards;
- (g) NON-PROJECT RELATED PROPERTY consists of land for which the disposition or transfer was desirable, but which was not required or initiated due to a specific project or undertaking. An example would be the disposition or transfer of surplus properties which were found to be in excess of the proponent's requirements after a facility had been designed or built. These are often small oddly shaped pieces of land which are usually sold to adjacent property owners.

3. Where a portion of this undertaking is part of another undertaking for which an approval is required under the Act, such portion shall be carried out in accordance with that approval.

4. Where an environmental assessment is submitted for a project associated with this undertaking, the project shall be deemed to be a separate undertaking and not exempt by this order.

5. Exemption Order MTCI-9 is revoked. O. Reg. 285/81.

NOTICE OF APPROVAL TO PROCEED WITH THE UNDERTAKING

RE: A Class Environmental Assessment—(B2) Expansion of an existing commuter bus terminal.
Proponent: Toronto Area Transit Operating Authority
E.A. File No. 2-78-0007-000

TAKE NOTICE that the period for requiring a hearing, provided for in the *Notice of Acceptance of the Environmental Assessment* for the undertaking, expired on January 28, 1981. There are no outstanding notices requiring a hearing by the Environmental Assessment Board with respect to approval to proceed with the undertaking.

I have considered the purpose of *The Environmental Assessment Act, 1975*, and the class environmental assessment of the undertaking as accepted by me.

Accordingly, I hereby give approval to proceed with the undertaking subject to the attached Conditions of Approval numbered one to twelve.

REASONS:

The reasons for giving approval are:

- (1) I received no submissions or notices requiring a hearing by the Environmental Assessment Board after giving the *Notice of Acceptance of the Environmental Assessment*, dated December 29, 1980. I am not aware of any outstanding issues with respect to this undertaking which suggest that a hearing should be required.
- (2) The class environmental assessment together with the Government review and the attached Conditions sufficiently fulfills the purpose of the Act,

which is the betterment of the people of the whole or any part of Ontario by providing for the protection, conservation and wise management in Ontario of the environment.

ROBERT WELCH,
Acting Minister of the
Environment,
135 St. Clair Avenue West,
14th Floor,
Toronto, Ontario M4V 1P5.

Approved by
O.C. No. 930/81

Dated at Toronto, the 2nd day of April, 1981.

CONDITIONS OF APPROVAL FOR TATOA B2,
EA File No. 2-79-0008-000,

This approval applies only to the undertaking as described in the Tronto Area Transit Operation Authority Class B2 document provided that the projects are planned and implemented in the manner outlined in the document and *subject to these Conditions of Approval*.

1. The undertaking includes the operation and maintenance of works constructed pursuant to this approval.
2. TATOA's proposals for the involvement of "Internal and External Agencies" and the public shall be subject to the following *additional* requirements:
 - (i) Notification as specified in the Class Environmental Assessment, regarding the progress of the study shall be given at a minimum of two contact points. The first contact point shall be prior to the evaluation and selection of concept alternatives for operational design. The second contact point shall be upon the filing of the Environmental Study Report (ESR) with the Ministry of the Environment (MOE). These notifications shall be given to the public and to potentially affected Ministries, agencies, municipalities and local transit authorities, as determined by the proponent and as required by sub-condition iv, and where projects are located in special planning areas such as the Niagara Escarpment Planning and Development Area or the Parkway Belt Planning and Development Area to the authority responsible for the administration of the plan;
 - (ii) The first notification referred to in sub-condition i shall include information on the rationale for the project and some baseline information on the environmental setting and/or an explanation of how TATOA proposes to gather or supplement this information during the planning of the project. It shall also contain information regarding the rights of the agencies and the public to request that any project under the Class be "elevated" to an Individual Environmental Assessment (EA) status;
3. TATOA shall add a step to the planning process described in the Class EA requiring that baseline information be gathered for the study area before the evaluation of concept alternatives. TATOA needs only to gather enough information with respect to any alternative with which it does not propose to proceed to make a decision that the alternative can be eliminated from further consideration.
4. The concept alternatives stage shall include consideration of locational alternatives.
5. Land acquisition for projects carried out under this approval shall occur only after completion of the Operational Design Stage as described in the Class EA documents. Optioning of property may, however, occur during the Operational Design Stage. An option to acquire land or a conditional agreement of purchase and sale of land may be entered into during the Operational Design Stage provided the option is not exercised or the purchase is not completed prior to completion of the operational design stage.
6. TATOA shall develop a contingency plan for quickly dealing with any gas or oil pipeline ruptures resulting from the construction of projects carried out under this approval and ensure that personnel familiar with the plan are on the construction site during excavation operations.
7. TATOA shall identify land-uses within the study area that are potentially hazardous to the public. This shall be done early in the planning process and TATOA shall consider these in the siting of projects planned under this approval.
8. TATOA shall maximize, to the extent practicable, the use of fire retardant materials in the construction of projects carried out under this approval.
- (iii) Any notification provided for in the EA in addition to the notification required by sub-conditions i and iv shall only be mandatory with regard to those who advise TATOA in writing that they wish to receive such notification. The first notification shall contain a statement to this effect;
- (iv) From time to time, TATOA shall arrange with each Ministry and agency which advises TATOA that it wishes to make such arrangements, procedures for determining how and in what circumstances it will be decided whether the Ministry or agency is "potentially affected" by a proposed project for purposes of sub-condition i;
- (v) Subject to condition 5, the ESR for every project within the Class shall be made available 30 days, or such other period as TATOA determines to be suitable in the circumstances, prior to any contract for carrying out the project being awarded by TATOA or the project being otherwise implemented, by filing two copies in the Public Record at MOE's Head Office and any affected MOE Regional Office as well as at TATOA's Head Office.

9. TATO A shall file a report with the Environmental Approvals Branch of the Ministry of the Environment not later than six months after this approval is issued or such later date as may be agreed to by the Director of the Environmental Approvals Branch, setting out a program by which TATO A will monitor projects carried out under this approval, to obtain information for the purpose of Condition 10, and shall carry out such a program.
10. TATO A shall carry out a re-evaluation of the Class EA covered by this approval, make appropriate revisions, and submit the revised environmental assessment for review under *The Environmental Assessment Act* before January 1st, 1985.
11. This approval shall terminate on the earlier of
 - (a) the date on which approval of the undertaking under a new EA submitted pursuant to Condition 10 is received under *The Environmental Assessment Act*; or
 - (b) January 1st, 1986, or such later date as the Minister specifies by notice published in THE ONTARIO GAZETTE.
12. The ESR for each project shall include clearly stated proposals for mitigating adverse effects on the environment. TATO A shall be responsible for ensuring, by site inspection and such other methods as may be necessary, that the construction of any part of a project covered by this approval is carried out in accordance with the procedures, including the proposals for mitigating adverse effects, specified in the ESR, the Class Environmental Assessment documents, this approval and these conditions.

NOTICE OF APPROVAL TO PROCEED WITH THE UNDERTAKING

RE: A Class Environmental Assessment—(B3) New commuter rail station or bus terminal with parking facilities for less than 300 automobiles and facilities accommodating not more than 300 bus departures per day.

Proponent: Toronto Area Transit Operating Authority

E.A. File No. 2-79-0009-000

TAKE NOTICE that the period for requiring a hearing, provided for in the *Notice of Acceptance of the Environmental Assessment* for the undertaking, expired on January 28, 1981. There are no outstanding notices requiring a hearing by the Environmental Assessment Board with respect to approval to proceed with the undertaking.

I have considered the purpose of *The Environmental Assessment Act, 1975*, and the class environmental assessment of the undertaking as accepted by me.

Accordingly, I hereby give approval to proceed with the undertaking subject to the attached Conditions of Approval numbered one to twelve.

REASONS:

The reasons for giving approval are:

- (1) I received no submissions or notices requiring a hearing by the Environmental Assessment Board after giving the *Notice of Acceptance of the Environmental Assessment*, dated December 29, 1980. I am not aware of any outstanding issues with respect to this undertaking which suggest that a hearing should be required.
- (2) The class environmental assessment together with the Government review and the attached Conditions sufficiently fulfills the purpose of the Act, which is the betterment of the people of the whole or any part of Ontario by providing for the protection, conservation and wise management in Ontario of the environment.

ROBERT WELCH,
Acting Minister of the
Environment,
135 St. Clair Avenue West,
14th Floor,
Toronto, Ontario M4V 1P5.

Approved by
O.C. No. 930/81

Dated at Toronto, the 2nd day of April, 1981.

CONDITIONS OF APPROVAL FOR TATO A B3,
EA File No. 2-79-0009-000,

This approval applies only to the undertaking as described in the Toronto Area Transit Operation Authority Class B3 document provided that the projects are planned and implemented in the manner outlined in the document and *subject to these Conditions of Approval*.

1. The undertaking includes the operation and maintenance of works constructed pursuant to this approval.
2. TATO A's proposals for the involvement of "Internal and External Agencies" and the public shall be subject to the following *additional* requirements:
 - (i) Notification as specified in the Class Environmental Assessment, regarding the progress of the study shall be given at a minimum of two contact points. The first

- contact point shall be prior to the evaluation and selection of concept alternatives for operational design. The second contact point shall be upon the filing of the Environmental Study Report (ESR) with the Ministry of the Environment (MOE). These notifications shall be given to the public and to potentially affected Ministries, agencies, municipalities and local transit authorities, as determined by the proponent and as required by sub-condition iv, and where projects are located in special planning areas such as the Niagara Escarpment Planning and Development Area or the Parkway Belt Planning and Development Area to the authority responsible for the administration of the plan;
- (ii) The first notification referred to in sub-condition i shall include information on the rationale for the project and some baseline information on the environmental setting and/or an explanation of how TATO A proposes to gather or supplement this information during the planning of the project. It shall also contain information regarding the rights of the agencies and the public to request that any project under the Class be "elevated" to an Individual Environmental Assessment (EA) status;
 - (iii) Any notification provided for in the EA in addition to the notification required by sub-conditions i and iv shall only be mandatory with regard to those who advise TATO A in writing that they wish to receive such notification. The first notification shall contain a statement to this effect;
 - (iv) From time to time, TATO A shall arrange with each Ministry and agency which advises TATO A that it wishes to make such arrangements, procedures for determining how and in what circumstances it will be decided whether the Ministry or agency is "potentially affected" by a proposed project for purposes of sub-condition i;

3. TATO A shall add a step to the planning process described in the Class EA requiring that baseline information be gathered for the study area before the evaluation of concept alternatives. TATO A needs only to gather enough information with respect to any alternative with which it does not propose to proceed to make a decision that the alternative can be eliminated from further consideration.
 4. The concept alternatives stage shall include consideration of locational alternatives.
 5. Land acquisition for projects carried out under this approval shall occur only after completion of the Operational Design Stage as described in the Class EA documents. Optioning of property may, however, occur during the Operational Design Stage. An option to acquire land or a conditional agreement of purchase and sale of land may be entered into during the Operational Design Stage provided the option is not exercised or the purchase is not completed prior to completion of the operational design stage.

 7. TATO A shall identify land-uses within the study area that are potentially hazardous to the public. This shall be done early in the planning process and TATO A shall consider these in the siting of projects planned under this approval.
 8. TATO A shall maximize, to the extent practicable, the use of fire retardant materials in the construction of projects carried out under this approval.
 9. TATO A shall file a report with the Environmental Approvals Branch of the Ministry of the Environment not later than six months after this approval is issued or such later date as may be agreed to by the Director of the Environmental Approvals Branch, setting out a program by which TATO A will monitor projects carried out under this approval, to obtain information for the purpose of Condition 10, and shall carry out such a program.
 10. TATO A shall carry out a re-evaluation of the Class EA covered by this approval, make appropriate revisions, and submit the revised environmental assessment for review under *The Environmental Assessment Act* before January 1st, 1985.
 11. This approval shall terminate on the earlier of,
 - (a) the date on which approval of the undertaking under a new EA submitted pursuant to Condition 10 is received under *The Environmental Assessment Act*; or
 - (b) January 1st, 1986, or such later date as the Minister specifies by notice published in THE ONTARIO GAZETTE.
 12. The ESR for each project shall include clearly stated proposals for mitigating adverse effects on the environment. TATO A shall be responsible for ensuring, by site inspection and such other methods as may be necessary, that the construction of any part of a project covered by this approval is carried out in accordance with the procedures, including the proposals for mitigating adverse effects, specified in the ESR, the Class Environmental Assessment documents, this approval and these conditions.

Crop Insurance Act (Ontario)

POPPING CORN ENDORSEMENT

WHEREAS the insured person has applied for crop insurance for popping corn under The Ontario Crop Insurance Plan for Popping Corn, hereinafter referred to as "the plan";

NOW THEREFORE, subject to the *Crop Insurance Act (Ontario)* and the regulations made thereunder, the contract of insurance between The Crop Insurance Commission of Ontario and the insured person is hereby extended to cover popping corn.

HARVESTING OF SEEDED ACREAGE

1. All acreage seeded to popping corn in a crop year shall be harvested unless the Commission, upon application therefor in writing, consents in writing to,
- (a) the use of the seeded acreage or any part thereof for another purpose; or

(b) the abandonment or destruction of the insured crop or any part thereof.

EVALUATION OF LOSS

2. For the purposes of determining the loss in production of popping corn in a crop year and the indem-

nity payable therefor, the value of the crop shall progress through the stages prescribed in paragraphs 3 and 4.

STAGE 1

3.—(1) Stage 1 comprises the period from the date on which the seeding of acreage to popping corn is completed to and including the 15th day of June in the crop year.

(2) Where loss or damage occurs in Stage 1, the Commission, upon application therefor in writing by the insured person, may consent in writing to,

- (a) the seeding of the damaged acreage to another crop; or
- (b) the abandonment or destruction of the insured crop on such damaged acreage and, in such case, the Commission shall determine the number of damaged acres and the potential production thereof.

(3) Where the damaged acreage is in excess of three acres and is reseeded in accordance with clause (2) (a), the contract of insurance shall cease to apply to such reseeded acreage and the total guaranteed production shall be reduced accordingly.

(4) Where the damaged acreage is abandoned or destroyed in accordance with clause (2) (b), the amount of loss that shall be taken into account in the final adjustment of loss in respect of the total seeded acreage shall be calculated by multiplying,

- (a) 50 per cent of the guaranteed production for the damaged acreage; or
- (b) the difference between the guaranteed production and the potential production determined under subparagraph (2), for the damaged acreage,

whichever is the lesser, by the established price per tonne.

(5) Subject to subparagraph (6), where the crop on damaged acreage is not abandoned or destroyed after the Commission has consented thereto, the amount of loss calculated under subparagraph (4) shall not be taken into account in the final adjustment of loss, and the value of the crop shall progress into Stage 2.

(6) Notwithstanding any application made in writing by the insured person under this paragraph, the Commission may, where loss or damage occurs in Stage 1, notify the insured person in writing that it intends to terminate the insurance coverage on such damaged acreage and to calculate the amount of loss in the manner prescribed in subparagraph (4) with respect to such damaged acreage and where notice of such intention has been given, the Commission shall calculate accordingly the amount of loss to be taken into account in the final adjustment of loss and the

value of the insured crop on such damaged acreage shall not progress beyond Stage 1.

STAGE 2

4.—(1) Stage 2 commences on the 16th day of June in the crop year and, with respect to any part of the seeded acreage, ends with the completion of harvesting of such part.

(2) Where loss or damage occurs in Stage 2, the Commission, upon application therefor in writing by the insured person, may consent in writing to the abandonment or destruction of the insured crop on such damaged acreage and in such case, the Commission shall determine the number of damaged acres and the potential production thereof.

(3) Where the insured crop is abandoned or destroyed in accordance with subparagraph (2), the amount of loss that shall be taken into account in the final adjustment of loss in respect of the total seeded acreage shall be calculated by multiplying the difference between,

- (a) the guaranteed production for the damaged acreage; and
- (b) the potential production determined under subparagraph (2) for the damaged acreage,

by the established price per tonne.

(4) Where the crop is not abandoned or destroyed after the Commission has consented thereto, the amount of loss calculated under subparagraph (3) shall not be taken into account in the final adjustment of loss.

(5) Where the actual production of the harvested acreage is less than the guaranteed production for such acreage, the amount of loss that shall be taken into account in the final adjustment of loss in respect of the total seeded acreage shall be calculated by multiplying the difference between the guaranteed production and the actual production by the established price per tonne.

SALVAGE

5. Where, as the result of an insured peril, the insured crop or any part thereof is suitable only for feed, the amount of loss that shall be taken into account in the final adjustment of loss shall be the amount by which the liability under this plan for the damaged acreage exceeds the actual production for the damaged acreage multiplied by the highest established price for grain corn under The Ontario Crop Insurance Plan for Corn.

6. The indemnity payable with respect to the total seeded acreage in the final adjustment of loss shall be the sum of all Stage 1 and Stage 2 loss calculations applicable to such acreage, but where,

- (a) the actual production of any harvested acreage; or
- (b) the potential production of any unharvested acreage,

exceeds the guaranteed production of such acreage, the indemnity otherwise payable for a loss in production shall be reduced by the amount obtained by multiplying such excess by the established price per tonne.

VARIATION IN SEEDED ACREAGE

7.—(1) Where the actual seeded acreage of popping corn in a crop year is less than the seeded acreage declared by the insured person, the guaranteed production and the amount of insurance shall be reduced proportionately.

(2) Where the actual seeded acreage of popping corn in a crop year exceeds the seeded acreage declared by the insured person, the total guaranteed production shall remain unchanged.

IN WITNESS WHEREOF The Crop Insurance Commission of Ontario has caused this endorsement to be signed by its general manager but the same shall not be binding upon the Commission until countersigned by a duly authorized representative thereof.

CONTRACT OF INSURANCE

BETWEEN:

THE CROP INSURANCE COMMISSION OF ONTARIO,
hereinafter referred to as "THE COMMISSION",

OF THE FIRST PART;

—and—

.....
of the of
in the County (or as the case may be) of

....., hereinafter referred to as "THE INSURED PERSON",

OF THE SECOND PART.

WHEREAS the insured person has applied for crop insurance on one or more crops under The Crop Insurance Plan for Fruit and Vegetables, hereinafter referred to as "the plan".

NOW THEREFORE, subject to the *Crop Insurance Act (Ontario)* and the regulations made thereunder, where in a crop year the insured person suffers a loss resulting from one or more of the perils designated in the plan, the Commission, subject to the terms and conditions hereinafter set forth, agrees to indemnify the insured person in respect of such loss.

CAUSES OF LOSS NOT INSURED AGAINST

1. This contract does not insure against and no indemnity shall be paid in respect of a loss resulting from,

- (a) the negligence, misconduct or poor farming practices of the insured person or his agents or employees;
- (b) a shortage of labour or machinery;
- (c) plant disease and insect infestation unless recommended spray programs and cultural practices were followed; or
- (d) a peril other than the perils designated in the plan.

EXTENT OF INSURANCE

2.—(1) The insured person shall offer for insurance all acreage planted in the crop year to the insured crop or crops on the farm or farms operated by him in Ontario, and, subject to subparagraph (2), this contract applies to all such acreage.

(2) This contract does not apply to, and no indemnity is payable in respect of, acreage planted to an insured crop,

- (a) that was not adequately prepared for cropping purposes;
- (b) that, in the opinion of the Commission, is not insurable; or
- (c) on which the insured crop is a volunteer crop.

3.—(1) Where the acreage planted by the insured person in the crop year is not the same as that stated in the application for insurance, the insured person shall, not later than the 15th day of July, notify the Commission in writing of the actual acreage planted.

(2) Where the actual planted acreage of an insured crop is less than that stated in the application for insurance, the maximum amount of indemnity shall be reduced proportionately.

(3) Where the actual planted acreage of an insured crop is more than that stated in the application for insurance, the maximum amount of indemnity and the premium payable shall not be increased but the potential of the total planted acreage shall be included in the calculation of a loss.

HARVESTING OF PLANTED ACREAGE

4. All acreage planted to an insured crop in the crop year shall be harvested unless the Commission, upon application therefor in writing, consents in writing to,

- (a) the use of the planted acreage or any part thereof for another purpose; or
- (b) the abandonment or destruction of the insured crop or any part thereof.

5.—(1) Where, at any time before harvest, any part of the insured crop is lost or damaged, the Commission, upon application therefor in writing by the insured person, may consent in writing to,

- (a) the replanting of the damaged acreage; or
- (b) the use of the damaged acreage for any other purpose or to the abandonment or destruction of the insured crop on such damaged acreage and, in such case, the Commission shall determine the number of damaged acres and the potential thereof.

(2) Where the damaged acreage is replanted to the insured crop in accordance with clause (1) (a), a benefit for each acre so replanted shall be paid in accordance with the Table and the contract of insurance shall continue to apply to such replanted acreage.

(3) Where the damaged acreage is used for any other purpose or the insured crop is abandoned or destroyed in accordance with clause (1) (b), a benefit for each acre so abandoned or destroyed shall be paid in accordance with the Table and the contract of insurance shall cease to apply to such acreage.

(4) Where the damaged acreage is not used for any other purpose or the crop is not abandoned or destroyed after the Commission has consented thereto, the amount of loss calculated under subparagraph (3) shall not be taken into account in the final adjustment of loss.

(5) Acreage planted to an insured crop shall not be put to another use and the insured crop shall not be abandoned or destroyed until the Commission has appraised the potential of the acreage.

EVALUATION OF LOSS

6.—(1) The amount of loss that shall be taken into account in the final adjustment of loss in respect of any damage to a crop caused by an insured peril shall be the amount by which the percentage coverage for that crop exceeds the potential as determined by the Commission for that crop multiplied by the insurance value selected by the insured person for the damaged acreage.

(2) The loss calculated under subparagraph (1) shall be reduced by the amount of any loss that, in the opinion of the Commission, was sustained by reason of a peril other than the perils designated in the plan.

MISREPRESENTATION, VIOLATION OF CONDITIONS
OR FRAUD

7. Where the insured person,

- (a) in the application for insurance,
 - (i) gives false particulars of an insured crop to the Commission, or
 - (ii) knowingly misrepresents or fails to disclose any fact required to be stated therein;
- (b) contravenes a term or condition of the contract of insurance;
- (c) commits a fraud in respect of an insured crop; or
- (d) wilfully makes a false statement in respect of a claim under the contract of insurance,

a claim by the insured person is invalid and his right to recover indemnity is forfeited.

WAIVER OR ALTERATION

8. No term or condition of this contract shall be deemed to be waived or altered in whole or in part by the Commission unless the waiver or alteration is clearly expressed in writing signed by the Commission or a representative authorized for that purpose by the Commission.

9. Notwithstanding that a person other than the insured person holds an interest of any kind in the insured crop, for the purposes of this contract,

- (a) the interest of the insured person in an insured crop is deemed to be the full value of the crop; and
- (b) except as provided in paragraph 10, no indemnity shall be paid to any person other than the insured person.

ASSIGNMENT OF RIGHT TO INDEMNITY

10. The insured person may assign all or part of his right to indemnity under this contract in respect of an insured crop but an assignment is not binding on the Commission and no payment of indemnity shall be made to an assignee unless,

- (a) the assignment is made on a form approved by the Commission; and
- (b) the Commission consents thereto in writing.

NOTICE OF LOSS

11.—(1) Where loss or damage to an insured crop results from one or more of the perils insured against, the insured person shall notify the Commission forthwith by telephone and shall confirm in writing within three days of such time in order that a full inspection can be carried out prior to harvest of the affected acreage.

(2) Where the insured person fails to notify the Commission pursuant to subparagraph (1), a claim by the insured person is invalid and his right to recover indemnity is forfeited.

ADJUSTMENT OF LOSS

12.—(1) The indemnity payable for loss or damage to an insured crop shall be determined in the manner prescribed by this contract.

(2) The Commission may cause the potential of an insured crop to be appraised by any method that it deems proper.

(3) No indemnity shall be paid for a loss in respect of an insured crop unless the insured person establishes that the loss or part thereof resulted directly from one or more of the perils insured against.

(4) Where a loss resulted partly from a peril insured against and partly from a cause of loss not insured against, the Commission shall determine the amount of the loss that resulted from the cause of loss not insured against, and the indemnity payable by the Commission under this contract shall be reduced accordingly.

PROOF OF LOSS

13.—(1) A claim for indemnity in respect of the insured crop shall be made on a proof of loss form provided by the Commission and shall be filed with the Commission not later than sixty days after,

- (a) the completion of harvesting of the last of the insured crops; or
- (b) the end of the crop year,

whichever is the earlier.

(2) Subject to subparagraph (3), a claim for indemnity shall be made by the insured person.

(3) A claim for indemnity may be made,

(a) in the case of the absence or inability of the insured person, by his agent; or

(b) in the case of the absence or inability of the insured person or on his failure or refusal to do so, by an assignee under an assignment made in accordance with paragraph 10.

(4) Where required by the Commission, the information given in a proof of loss shall be verified by statutory declaration.

ARBITRATION

14. Where the Commission and the insured person fail to resolve any dispute respecting the adjustment of a loss under this contract, the matter shall be determined by arbitration in accordance with the regulations.

TIME FOR PAYMENT OF INDEMNITY

15.—(1) No indemnity under this contract becomes due and payable until,

(a) the end of the crop year; and

(b) the premium has been paid in full.

(2) Where the indemnity payable by the Commission under this contract is established by the filing of a proof of loss form or by an award of an arbitrator or board of arbitration, it shall be paid within sixty days of the receipt by the Commission of the proof of loss form or award, as the case may be.

(3) Nothing in this paragraph prevents the Commission from paying indemnity under this contract at an earlier date.

SUBROGATION

16. Where the Commission has paid a claim under this contract, the Commission is subrogated to the extent thereof to all rights of recovery of the insured person against any person and may bring action in the name of the insured person to enforce those rights.

RIGHT OF ENTRY

17. The Commission has a right of entry to the premises of the insured person that may be exercised by agents of the Commission at any reasonable time or times for any purpose related to the contract of insurance.

18.—(1) Any written notice to the Commission shall be given by delivery thereof or by sending it by mail to the Commission.

(2) Written notice to the insured person shall be given by delivery thereof or by sending it by mail addressed to him at his last post office address on file with the Commission.

IN WITNESS WHEREOF The Crop Insurance Commission of Ontario has caused this contract of insurance to be signed by its general manager but the same shall not be binding upon the Commission until countersigned by a duly authorized representative thereof.

Crop Insurance Act (Ontario)

POTATO ENDORSEMENT

WHEREAS the insured person has applied for crop insurance for potatoes under The Ontario Crop Insurance Plan for Potatoes, hereinafter referred to as "the plan", and has paid the deposit premium prescribed thereunder:

NOW THEREFORE, subject to the *Crop Insurance Act (Ontario)* and the regulations made thereunder, the contract of insurance between The Crop Insurance Commission of Ontario and the insured person is hereby extended to cover potatoes.

HARVESTING OF PLANTED ACREAGE

1.—(1) All acreage planted to potatoes in a crop year shall be harvested unless the Commission, upon application therefor in writing, consents in writing to,

- (a) the use of the planted acreage or any part thereof for another purpose; or
- (b) the abandonment or destruction of the insured crop or any part thereof.

(2) Where the harvesting of any planted acreage is not completed on the final date for the harvesting prescribed by the plan, the insured person shall forthwith notify the Commission in writing.

(3) Where the insured person fails to notify the Commission in accordance with subparagraph (2), no indemnity shall be paid in respect of the unharvested acreage.

STAGE 1

2.—(1) Stage 1 comprises the period from the date on which the planting of acreage to potatoes is completed to and including the 15th day of June.

(2) Where three acres or more of the insured crop is lost or damaged in Stage 1, the Commission, upon application therefor in writing by the insured person may consent in writing to,

- (a) the replanting of the damaged acreage provided that the replanting is completed not later than the 15th day of June; or
- (b) the abandonment or destruction of the insured crop on such damaged acreage and in such case the Commission shall determine the number of damaged acres and the potential production thereof.

(3) Where the damaged acreage is replanted to potatoes in accordance with clause (2) (a), the Commission shall pay an indemnity of \$150 for each acre

replanted and the contract of insurance shall continue to apply to such replanted acreage.

(4) Where the damaged acreage is replanted to another crop, the Commission shall pay an indemnity of \$150 per acre and the contract of insurance shall terminate with respect to such acreage.

(5) Where the damaged acreage is destroyed or abandoned in accordance with clause (2) (b), the amount of loss that shall be taken into account in the final adjustment of loss in respect of the total planted acreage shall be calculated by multiplying,

- (a) 50 per cent of the guaranteed production for the damaged acreage; or
- (b) the difference between the guaranteed production and the potential production determined under subparagraph (2) for the damaged acreage,

whichever is the lesser by the established price per hundredweight.

(6) Notwithstanding any application made in writing by the insured person under this paragraph, the Commission may, where loss or damage occurs in Stage 1, notify the insured person in writing that it intends to terminate the insurance coverage on such damaged acreage and, in such case, no further indemnity shall be payable in respect of the damaged acreage.

STAGE 2

3.—(1) Stage 2 commences on the 16th day of June and for any part of the planted acreage ends with the completion of harvesting of such part.

(2) Where loss or damage occurs in Stage 2, the Commission, upon application therefor in writing by the insured person, may consent in writing to the use of the damaged acreage for any other purpose or to the abandonment or destruction of the insured crop on such damaged acreage and, in such case, the Commission shall determine the number of damaged acres and the potential production thereof.

(3) Where,

- (a) damaged acreage is used for any other purpose or the insured crop thereon is abandoned or destroyed in accordance with subparagraph (2); or
- (b) the harvesting of any planted acreage is not completed on the date determined therefor,

the amount of loss that shall be taken into account in the final adjustment of loss in respect of the total planted acreage shall be calculated by multiplying the amount by which the guaranteed production for the damaged or unharvested acreage, as the case may be,

exceeds the potential production determined therefor by the price per hundredweight.

(4) Where damaged acreage is not used for any other purpose or the crop thereon is not abandoned or destroyed after the Commission has consented thereto, the amount of loss calculated under subparagraph (3) shall not be taken into account in the final adjustment of loss.

(5) Where the actual production of the acreage harvested is less than the guaranteed production for such acreage, the amount of loss that shall be taken into account in the final adjustment of loss in respect of the total planted acreage shall be calculated by multiplying the difference between the guaranteed production and the actual production by the established price per hundredweight.

FINAL ADJUSTMENT OF LOSS FOR
TOTAL PLANTED ACREAGE

4.—(1) The indemnity payable with respect to the total planted acreage in the final adjustment of loss shall be the sum of all Stage 1 and Stage 2 loss calculations applicable to such acreage, but, subject to subparagraph (2), where the actual production of any harvested acreage or the potential production of any unharvested acreage exceeds the guaranteed production of such acreage, the indemnity otherwise payable shall be reduced by the amount obtained by multiplying such excess by the established price per hundredweight.

(2) No more than one indemnity payment with respect to the same planted acreage shall be paid in any one of the Stages.

(3) Where a loss resulted partly from a peril insured against and partly from a cause of loss not insured against, the Commission shall determine the amount of the loss not insured against, and the indemnity payable by the Commission under the contract shall be reduced accordingly.

(4) Where the insured acreage or any part thereof is harvested prior to the 15th day of August in the crop year, the yield to count shall be deemed to be not less than the guaranteed production for such acreage.

DAMAGED AFTER HARVEST

5.—(1) No indemnity shall be paid in respect of any loss or damage suffered by the insured crop after harvest and, subject to subparagraph (2), no indemnity shall be paid with respect to potatoes in storage.

(2) Where, as a result of frost damage prior to harvest, the insured crop or any part thereof breaks down in storage, the Commission shall pay an indemnity therefor provided,

- (a) notice of frost damage was received by the Commission prior to harvest; and
- (b) the damaged potatoes are clearly identified in storage to the satisfaction of the Commission.

MEASUREMENT OF YIELD

6. The Commission may measure the yield of the insured crop either before or after harvest by such means as it deems proper.

INCORRECT ACREAGE IN FINAL ACREAGE REPORT

7.—(1) Where the actual planted acreage of potatoes in a crop year is less than the planted acreage declared on the final acreage report, the total guaranteed production and the amount of insurance shall be reduced proportionately.

(2) Where the actual planted acreage of potatoes in a crop year exceeds the planted acreage declared on the final acreage report, the total guaranteed production shall remain unchanged.

NOTICE OF LOSS OR DAMAGE

8. Where loss or damage to the insured crop results from one or more of the perils insured against and the damage was occasioned at a readily ascertainable time, the insured person shall notify the Commission forthwith by telephone and shall confirm in writing within twenty-four hours of such time.

IN WITNESS WHEREOF The Crop Insurance Commission of Ontario has caused this endorsement to be signed by its general manager but the same shall not be binding upon the Commission until countersigned by a duly authorized representative thereof.

FINAL ADJUSTMENT OF LOSS FOR
TOTAL PLANTED ACREAGE

3.—(1) The indemnity payable with respect to the total planted acreage in the final adjustment of loss shall be the sum of all loss calculations applicable to such acreage, but where the actual production of any harvested acreage or the potential production of any unharvested acreage exceeds the guaranteed production of such acreage, the indemnity otherwise payable shall be reduced by the amount obtained by multiplying such excess by the established price per ton.

(2) Where a loss resulted partly from a peril insured against and partly from a cause of loss not insured against, the Commission shall determine the amount of the loss not insured against, and the indemnity payable by the Commission under the contract shall be reduced accordingly.

Form 2

Crop Insurance Act (Ontario)

ONION ENDORSEMENT

WHEREAS the insured person has applied for crop insurance under The Ontario Crop Insurance Plan for Spanish Onions hereinafter referred to as "the plan", and has paid the deposit premium prescribed thereunder;

NOW THEREFORE, subject to the *Crop Insurance Act (Ontario)* and the regulations made thereunder, the contract of insurance between The Crop Insurance Commission of Ontario and the insured person is hereby extended to cover spanish onions.

HARVESTING OF PLANTED ACREAGE

1. All acreage planted to onions in a crop year shall be harvested unless the Commission, upon application therefor in writing, consents in writing to,

- (a) the use of the planted acreage or any part thereof for another purpose; or
- (b) the abandonment or destruction of the insured crop or any part thereof.

EVALUATION OF LOSS

2. For the purposes of determining the loss in production of onions in a crop year and the indemnity payable therefor, the value of the crop shall progress through the stages prescribed in paragraphs 3 and 4.

STAGE 1

3.—(1) Stage 1 comprises the period from the 15th day of April to and including the 20th day of May in the crop year.

(2) Where loss or damage to one acre or more of the insured crop occurs in Stage 1, the Commission, upon application therefor in writing by the insured person, may consent in writing to,

- (a) the replanting of the damaged acreage, provided that the replanting is completed not later than the 20th day of May; or
- (b) the use of the damaged acreage for any other purpose or to the abandonment or destruction of the insured crop on such damaged acreage.

(3) Where the damaged acreage is replanted to onions in accordance with clause (2) (a), the Commission shall pay an indemnity of \$500 for each acre replanted and the contract of insurance shall continue to apply to such acreage.

(4) Where the damaged acreage is used for any other purpose or the insured crop is abandoned or destroyed in accordance with clause (2) (b), the Commission shall pay an indemnity of \$500 per acre and the contract of insurance shall terminate with respect to such acreage.

(5) Notwithstanding any application made in writing by the insured person under this paragraph, the Commission may, where loss or damage occurs in Stage 1, notify the insured person in writing that it intends to terminate the insurance coverage on such damaged acreage and, in such case, no further indemnity shall be payable in respect of the damaged acreage.

STAGE 2

4.—(1) Stage 2 commences on the 21st day of May in the crop year and, with respect to any part of the planted acreage, ends on completion of harvesting.

(2) Where loss or damage occurs in Stage 2, the Commission, upon application therefor in writing by the insured person, may consent in writing to the use of the damaged acreage for any other purpose or to the abandonment or destruction of the insured crop on such damaged acreage and, in such case, the Commission shall determine the number of damaged acres and the potential production thereof and the amount of loss that shall be taken into account in the final adjustment of loss in respect of the total planted acreage shall be calculated by multiplying the amount by which the guaranteed production for the damaged acreage exceeds the potential production determined therefor by the established price per bag.

(3) Where damaged acreage is not used for any other purpose or the crop thereon is not abandoned or destroyed after the Commission has consented thereto, the amount of loss calculated under subparagraph (2) shall not be taken into account in the final adjustment of loss.

(4) Where the actual production of the acreage harvested is less than the guaranteed production for such acreage, the amount of loss that shall be taken into account in the final adjustment of loss in respect of the total planted acreage shall be calculated by multiplying the difference between the guaranteed production and the actual production by the established price per bag.

FINAL ADJUSTMENT OF LOSS FOR
TOTAL PLANTED ACREAGE

5.—(1) The indemnity payable with respect to the total planted acreage in the final adjustment of loss shall be the sum of all Stage 1 and Stage 2 loss calculations applicable to such acreage, but subject to subparagraph (2), where,

- (a) the actual production of any harvested acreage; or

(b) the potential production of any unharvested acreage,

exceeds the guaranteed production of such acreage, the indemnity otherwise payable shall be reduced by the amount obtained by multiplying such excess by the established price per bag.

(2) Notwithstanding subparagraph (1), no indemnity paid in Stage 1 shall be subject to reduction under this paragraph.

(3) In no case shall indemnity be paid for acreage in excess of the total insured acreage.

THE ENVIRONMENTAL ASSESSMENT ACT, 1975

O. Reg. 318/81.

Exemption—Ministry of Government
Services—MGS-44.

Made—May 5th, 1981.

Approved—April 9th, 1981.

Filed—May 12th, 1981.

ORDER MADE UNDER
THE ENVIRONMENTAL ASSESSMENT
ACT, 1975

EXEMPTION—MINISTRY OF GOVERNMENT SERVICES—MGS-44

Having received a request from the Minister of Government Services that an undertaking, namely:

Replacement of the existing steam heating plant by the construction of individual heating plants for twenty structures at the Huron Industrial Park in Huron Park, Stephen Township, Huron County,

be exempted from the application of the Act pursuant to Section 30; and

Having been advised that if the undertaking is subject to the application of the Act, the following damage or interference with the person indicated will occur:

- A. The Crown will be damaged and interfered with by the undue expense required to prepare an environmental assessment for an undertaking that will have no significant adverse effect on the environment, and that is needed by the Ontario Development Corporation to overcome current operational problems associated with the presently existing heating facilities which are inadequate for present and future requirements.

Having weighed such damage or interference against the betterment of the people of the whole or any part of Ontario by the protection, conservation and wise management in Ontario by the environment, which would result from the undertaking being subject to the application of the Act;

The undersigned is of the opinion that it is in the public interest to order and orders that the undertaking is exempt from the application of the Act for the following reasons:

- A. The Minister of Government Services has informed me that the undertaking is unlikely to have any significant adverse environmental impacts and that adequate gas, electricity and water services exist to accommodate the proposed development.

This exemption order is subject to the following terms and conditions:

1. That tenders for the construction of the facility be awarded no later than June 30, 1981. O. Reg. 318/81.

Treasurers' Sales of Lands for Taxes

Each year, municipal and county treasurers compile a list of properties against which taxes are outstanding for at least two successive years, which is a period sufficient to permit sale of the owner's assets to reimburse the municipality. These lists are submitted by the municipal representative to the Ministry of Government Services for publication in THE ONTARIO GAZETTE.

The Gazette is published every Saturday. Tax sale lands are included only in the issue of the first Saturday of each month. Each property is described so that it may be properly identified. Also shown are the amount of tax arrears and costs, and the date, time and place where the sale will be held, which is usually in a public building in the locality. Sales are held three months or later following the date of publication in the Gazette and are subject to a reserve bid equal to the amount of tax arrears and costs.

The previous owner may by law redeem the property any time within one year and one day after the date of tax sale by paying to the municipality all arrears plus costs levied. Where redemption occurs, the municipality reimburses the purchaser of tax sale lands for the amount paid at the sale plus an additional amount to be determined in each case.

If the land is not redeemed in the manner described above, the purchaser at sale, receives from the municipality a tax deed or certificate which should be registered in the appropriate Land Titles or Registry Office. A purchaser should ascertain from either of these offices, information relating to any of the charges or liens against the land and consider the advisability of employing the services of a solicitor to determine the extent, if any, of his liability.

The foregoing applies to tax sale lands which were privately owned. In the event the land is the property of the Crown as represented by the Province of Ontario, only the improvements on the property, such as buildings, may be sold. In this case, an intending purchaser should for his own protection ascertain from the local office of the Ministry of Natural Resources whether or not the land or any part can be purchased or leased from the Ministry. If it cannot, then the purchaser of the improvements would be required to remove them from the land.

In some cases, land advertised for sale in the Gazette may be bought by the municipality, or the owner, prior to sale, may pay the tax arrears and costs. Where this occurs, the land is removed from the tax sale lists.

SCHEDULE 15

SCHEDULE OF BENEFITS

PREAMBLE

A. General

1. The rates listed in this Schedule of Benefits are the maximum payments which can be made by the Ontario Health Insurance Plan.

2. Insured medical services are limited to the services which are medically necessary, which are listed in this Schedule of Benefits and which are not specifically excluded by legislation or regulation (see Appendix A for a list of specific exclusions).

3. Additions, deletions or other modifications of the Schedule of Benefits require recommendation by the Ontario Health Insurance Plan. Such recommendations are made in consultation with the Ontario Medical Association.

4. This Schedule is a public document and frank discussion with patients regarding the listed rates is recommended.

5. Claims for services which are not listed in the Schedule or which are listed as N.A.B. (not a benefit) or which are excluded as benefits by legislation or regulation should not be submitted to the Plan. Such services may be charged directly to patients or others requesting them.

6. The principles governing proper professional charges are incorporated in the Regulations (Medicine) of the Health Disciplines Act.

7. Each physician who participates in the care of a patient is entitled to compensation commensurate with the services he renders.

8. Whenever possible, the physician should acquaint the patient or person financially responsible with his obligations to those concerned with his care. This is particularly important where supportive or concurrent care is rendered or when a consultation and/or procedure are being arranged.

9. Each physician participating in the care of a patient should render to the patient, or to the financially responsible party, an itemized statement of charges for professional services.

10. Each physician participating in the care of a patient should, on request, send a receipt to the patient for all payments made by him.

11. If fees are collected by an organized group, the name of the physician rendering the service should be clearly shown on the bill or claim card.

12. Documentation: whenever a physician examines or treats a patient, an appropriate record of this service must be made and such record must be in keeping with section 28 of Regulation 577/75 of the Health Disciplines Act, 1974 (see Appendix B).

13. Claims may be submitted for services which a patient receives from the team of staff man, resident, intern and clerk in a teaching unit, provided that the conditions as set out hereunder apply.

On October 10, 1972, the Minister of Health confirmed that the joint recommendations of the College and the O.M.A. governing the charging of fees for services provided by interns and residents in clinical teaching units are acceptable to the Ministry of Health. In his letter the Minister made it very clear that he is looking to the College and the Medical Schools to en-

PREAMBLE

sure that the ethical rules governing these billing procedures are followed meticulously in all cases.

It has been carefully explained that the responsible staff man must be present in the clinical teaching unit at the time the services are rendered and must be identified to the patient at the earliest possible moment. No fees are to be charged for services given by the intern or resident prior to this identification taking place. The following rules are now in effect:—

When patient care is rendered in a clinical teaching unit or other setting for clinical teaching by a health care team, the physician responsible shall be personally identified to the patient. His relationship to the team shall be defined by the clinical teaching unit Director and his role must be known to the patient and other members of the team. He shall assume full responsibility for the appropriateness and the quality of the services rendered.

Specific regulations must vary with the service and form of care being delivered:—

- (a) In order to claim for physical procedures being carried out by an intern or resident, the responsible staff man must be in the clinical teaching unit and immediately available to intervene.
- (b) In psychotherapy where the presence of the staff man would distort the psychotherapy milieu, it is appropriate for the staff man to claim for psychotherapy when a record of the interview is carefully reviewed with the resident and the procedure thus supervised. However, the time charged by the staff man may not exceed the total time spent by him in both such interview review and in direct supervision.
- (c) In other departments or services, the staff man should only claim for visits on the days when actual supervision of that patient's care takes place through the presence of that staff man in the clinical teaching unit on that day. This, of course, involves a physical visit to the patient and/or a chart review with detailed discussion with the other member(s) of the health team.
- (d) In those situations where on a regular basis a staff member might supervise concurrently multiple procedures or services through the use of other members of the team, the total claims made by the staff man shall not exceed the amount that the staff man might make in the absence of the other members of the team.

Any claim rendered should be in the name of the responsible staff man.

14. Charges for missed appointments are not benefits of O.H.I.P.

B. Terms and Definitions

Call or Visit: is the service by a physician to or on behalf of a patient for assessment and/or treatment.

1. Consultations:

- (a) A consultation refers to the situation where a physician, in light of his professional knowledge of the patient, requests the opinion of another physician competent to give advice in this field, because of the complexity, obscurity or seriousness of the case or because another opinion is requested by the patient or an authorized person acting on his behalf. The consultant is obliged to perform a general or specific assessment, review the laboratory and/or other data and submit his findings, opinions and recommendations in writing to the referring physician.
- (b) If a consultant is requested by a physician on duty in the emergency department to

PREAMBLE

see a patient in consultation, the consultant may claim a consultation for this service. If the consultant is requested to perform this same service by a resident or intern, the consultant may claim a general or specific assessment according to his specialty.

- (c) For laboratory and procedural benefits connected with consultations, see listings of Laboratory Medicine and Diagnostic and Therapeutic Procedures.
- (d) A consultation is not to be claimed as such when:
 - (i) The patient presents himself to a consultant's office without prior knowledge of the primary physician. The sending of a report to the primary physician under these circumstances does not justify a claim for a consultation.
 - (ii) The primary physician is not asked for professional advice but is simply asked by the patient for the name of a specialist in a particular field and the patient seeks out the specialist himself.
- (e) A limited consultation may involve all of the components of a full consultation but is less demanding, and in terms of time, normally requires substantially less of the physician's time than the full consultation.
- (f) A diagnostic radiology consultation applies when radiographs made elsewhere are referred to a radiologist for his written opinion or when a radiologist is required to make a special visit at Night (5.00 p.m. to 7.00 a.m.), Saturdays, Sundays and Holidays to consult on the advisability of performing a diagnostic radiological procedure which eventually is not done. A consultation does not apply when the radiographs referred to above are used for comparison purposes with radiographs made in the consultant's facilities.
- (g) A diagnostic pathology consultation applies when tissue slides are referred to a second pathologist for a written opinion. It includes secretarial or other assistance and does not apply when the tissue slides referred to above are used for comparison with tissue slides done in the consultant's facilities. When a diagnostic pathology consultation fee is claimed L821 may not also be claimed.
- (h) A pathology consultation or repeat consultation applies when a pathologist is requested to examine a patient and provide a written opinion.
- (i) A diagnostic nuclear medicine consultation applies when nuclear medicine studies are referred to a nuclear medicine specialist for a written opinion or when the nuclear medicine physician is required to make a special visit at night (5.00 p.m. to 7.00 a.m.), Saturday, Sunday or Holiday to consult on the advisability of performing a nuclear medicine procedure which eventually is not done. A consultation does not apply when procedures done elsewhere are used for comparison purposes with nuclear medicine studies made in the consultant's facilities.
- (j) A nuclear medicine consultation or repeat consultation applies when a nuclear medicine specialist is requested to examine a patient and provide a written opinion, all of which takes a greater amount of time and effort than a nuclear medicine study would normally require. It may be done in conjunction with a nuclear medicine study but if so, the lesser professional benefit (P_2) rather than the greater benefit (P_1) should be claimed in addition to the technical (T) benefit.
- (k) Some nuclear medicine specialists have other specialist qualifications which allow

PREAMBLE

them to claim other consultation benefits (e.g., internal medicine). A nuclear medicine consultation or repeat consultation may be claimed in lieu of another consultation (e.g., internal medicine) but would not be combined with a claim for such a consultation by the same consultant.

- (l) A prenatal consultation by a paediatrician applies when a physician considers a foetus of greater than 20 weeks gestation to be at risk or in jeopardy by reason of continuation of pregnancy in the presence of maternal and/or foetal distress, and requests the opinion of a paediatrician competent to give advice in this field. The paediatrician shall perform a general or specific assessment, review laboratory and other data and submit his findings and recommendations in writing to the referring physician. Such a consultation does not preclude the paediatrician from a postnatal consultation on the infant.
- (m) OHIP benefits for consultations normally are limited to one consultation per year, per patient, by any one physician. However, if the same patient is referred to the same consultant a second time within the year with a clearly defined unrelated diagnosis, one additional consultation may be claimed per year.

2. **Repeat Consultation:** requires all of the criteria of a full consultation and implies interval care by the primary physician. The situation in which the consultant requests the patient to return for a later examination is not a repeat consultation.

3. **General Assessment:** shall comprise a full history, an enquiry into, and an examination of all parts or systems (and may include a detailed examination of one or more parts or systems), an appropriate record, and advice to the patient.*

OHIP benefits for general assessments normally are limited to one per year per patient by any one physician. However, if the same patient presents again within the year to the same physician with a clearly defined new diagnosis, one additional general assessment may be claimed per year. In the case of a patient who proceeds normally to hospital, the admitting physician may claim one additional general assessment per year provided 90 days have elapsed since the last general assessment rendered (anywhere) to that patient by the admitting physician. If the patient doesn't qualify for a general assessment by the admitting physician, he may claim a general re-assessment.

4. **General Re-Assessment:** shall comprise the same services as a general assessment except that the history need not include all the detail already obtained in the original general assessment.*

OHIP benefits for general re-assessments, except for hospital admission re-assessments, are limited to two per year, per patient, by any one physician.

5. **Specific Assessment:** shall comprise a full history of the presenting complaint, enquiry concerning, and detailed examination of the affected part, region or system, as needed to make a diagnosis and/or exclude disease and/or assess function, an appropriate record, and advice to the patient.*

Physicians qualified in two specialities (EENT for example) may only claim for one visit, eg: a consultation (if referred) or a specific assessment (if non-referred), if both systems are

*For laboratory and other investigation performed in conjunction with a consultation or visit, see Diagnostic and Therapeutic Procedures and Laboratory Medicine.

PREAMBLE

examined during the same visit. However, two consultations or two specific assessments, etc. may be claimed if both systems are examined, each on a separate visit.

OHIP benefits for specific assessments normally are limited to one per year, per patient, by any one physician. However, if the same patient presents again within the year to the same physician with a clearly defined new diagnosis, one additional specific assessment may be claimed per year.

6. Specific Re-Assessment: shall comprise a full relevant history and a comprehensive physical examination of one or more systems but not requiring an evaluation of the patient as a whole.*

In the surgical specialties, anaesthesia and dermatology, a specific re-assessment applies when a repeat specific assessment is required and carried out on a patient within a year's time for the same condition and with the same diagnosis; it shall comprise the same services as a specific assessment except that the history need not include all of the detail already obtained in the original specific assessment. A specific re-assessment is not to be claimed for treating a minor problem or for visits required solely for assessing the response to a treatment of a previously diagnosed condition unless an additional clinical assessment is required and performed.

In the medical specialties, a specific re-assessment applies in the management and assessment of the progress of serious chronic disease. It is not to be claimed for treating a minor problem or for visits required solely for assessing the response to treatment of a previously diagnosed condition unless an additional clinical assessment is required and performed.

7. Intermediate Assessment: is a more extensive assessment than a minor assessment and shall comprise a history of the presenting complaint(s), enquiry concerning and examination of the affected part(s), region(s), or system(s) or emotional disorder as needed to make a diagnosis, exclude disease and/or assess function, an appropriate record, and advice to the patient.*

8. Multiple Systems Assessment: shall comprise a detailed history and examination of more than one system, part or region, an appropriate record and advice to the patient.

9. Minor Assessment: is a brief assessment comprising the necessary history, examination of the affected part or region, an appropriate record and advice to the patient. It also applies to a subsequent visit solely for assessing the response to treatment of a previously diagnosed condition when the necessary examination and/or assessment reveals that no additional clinical assessment is required and none is performed.*

10. Psychotherapy: is any form of treatment for mental illness, behavioural maladaptations, and/or other problems that are assumed to be of an emotional nature, in which a physician deliberately establishes a professional relationship with a patient for the purposes of removing, modifying or retarding existing symptoms or attenuating or reversing disturbed patterns of behaviour, and of promoting positive personality growth and development. Accordingly, therefore, a psychotherapeutic procedure may be claimed if a half hour or major part thereof has been spent by a physician in such treatment of the patient. Psychotherapy may not be claimed by more than one physician for the same patient at the same time.

Please note that the College of Physicians and Surgeons of Ontario has stated that "in or-

PREAMBLE

der to qualify for a psychotherapy claim, a minimum of twenty minutes must be spent with the patient. When psychotherapy extends beyond thirty minutes, the major part of the next half hour must be spent with the patient to qualify for an additional half hour fee. Similarly, after an hour of psychotherapy, the major part of the next half hour must be spent to qualify for an additional half hour fee and so on.” (Medical Review Committee Bulletin, Volume 3, Number 1.)

11. **Counselling:** as distinct from psychotherapy, counselling is that activity in which the physician engages in an educational dialogue with the patient(s) on an individual or group basis wherein the goal of the physician and patient(s) is to become aware of the patient(s) problems or situation and of modalities for prevention and/or treatment. Counselling is not intended for ongoing treatment or a substitute for a patient assessment, and it must be rendered personally by the attending physician.

Advice given during a visit for patient assessment and relative to that assessment (see definitions) is included in the assessment benefit and does not qualify for “counselling”.

12. **Genetic Counselling:** includes interviewing the appropriate family members, the collection and assessment of adequate clinical and genetic data to make a diagnosis, construct a pedigree, and assess the risks to persons seeking advice. It includes imparting this information and the various alternatives to the appropriate family members in such a way that they can make informed decisions about dealing with the genetic problem.

13. **Examinations of Well Persons:**

(a) **Age:** (unless otherwise specified)

Newborn — up to 10 days of age.

Infant — up to 2 years

Child — up to and including 15 years

Adolescent — up to and including 17 years

Adult — 18 years or over.

(b) **Newborn Care:** is the routine care of a well baby up to ten days of age and should include a complete physical examination of the baby and necessary instructions to the mother. The service shall involve at least two visits, and normally may not be claimed for the same patient by more than one physician.

When a well baby is transferred to another hospital (because of the mother’s state of health, for example) claims for newborn care by a physician at each hospital may be appropriate.

(c) **Low Birth Weight Care:** is the care of a baby weighing less than 2.5 kilograms at birth.

(d) **Well Baby Care:** the periodic visits of a well baby during the first two years of life involving complete examination with necessary weight and measurements and instructions to the parent(s) regarding health care.

(e) **Annual Health or Annual Physical Examination** (Including Primary and Secondary School Examinations): shall comprise all the elements of a general assessment as it pertains to an individual who presents and reveals no apparent physical or mental illness. O.H.I.P. benefits for any one physician are limited to one Annual Health Ex-

PREAMBLE

amination per patient per year after the second birthdate. To qualify for O.H.I.P. benefits, an Annual Health Examination normally must be requested by the patient rather than a third party. Under Regulation 323 of The Health Insurance Act, 1972, examinations for the purpose of "legal requirements or proceedings" are excluded from coverage. However, it is recognized that an Annual Health Examination will satisfy some or all of the requirements for examinations required by statute but excluded by the above mentioned Regulation. In such instances and where a prior claim for an Annual Health Examination has not been submitted to the Plan in the previous twelve months for that patient, it would be appropriate to submit a claim to OHIP for this service. The OHIP benefit in these cases covers the Annual Health Examination only and not any charges peculiar to the legal requirements, such as charges for the completion of forms.

Other Terms, Definitions and Guidelines

14. **Coding:** This schedule lists a code number opposite most items. Items which are not coded are identified either as U.V.C. or N.C.

U.V.C. — use visit codes applicable to the pertinent service and specialty.

N.C. — no code applicable. This service is not a benefit (N.A.B.) of O.H.I.P., and may be charged directly to patients.

For the surgery portion of this schedule, physicians submitting claims in coded form should add to the code numbers, the suffix A if they perform the procedure, the suffix B if they have assisted at the surgery or the suffix C if they have administered the anaesthetic.

For those diagnostic and/or therapeutic procedures which have the technical and professional components listed separately, but under the same code, the suffix A should be added to the code numbers when both components are being claimed, the suffix B when only the technical component is being claimed, or the suffix C when only the professional component is being claimed.

Where separate codes are listed for the technical or the professional components, the suffix A should be used.

For diagnostic radiology, only one code is listed for each service, even though some of these services may be provided by non-certified radiologists. The code for services rendered by non-certified radiologists should be obtained by increasing the first digit in the listed codes by 5. Thus, for example, the code for the service listed as X001 but rendered by a non-certified radiologist would be X501 plus the appropriate suffix.

15. **General Listings:** include the basic listings for consultations, assessments and other visits wherever they are rendered, except for non-emergency services to hospital or long-term care institution in-patients and for care rendered by a physician on duty in an emergency department. These latter services are listed separately in the Schedule.

A visit rendered to a patient in a rest home, lodge, detoxification centre, half-way house, or other institution not covered elsewhere in the Schedule, should be claimed under the General Listings.

16. **Non-Emergency Hospital In-Patient Services:** include the listings for consultations and other visits to registered bed patients.

(a) The general assessment, general re-assessment, specific assessment or specific re-as-

PREAMBLE

assessment rendered in conjunction with a patient's admission to hospital is considered to be the hospital "admission assessment". Such assessments may not be claimed more than once during a hospital admission even if a patient's care subsequently is transferred to another physician. Moreover, such assessments may not be claimed by a consultant who also is claiming a consultation in conjunction with the patient's admission to hospital. Such consultation by the admitting physician serves as the admission history and examination.

- (b) Subsequent routine visits should be claimed as "subsequent visits (minor assessments)" Claims for daily hospital visits must not be made unless a physician actually visits the patient each day. Prior to the weekly and monthly limitations that apply after a patient has been in hospital for 5 weeks (6 weeks for paediatricians), payments for hospital visits generally are limited to one per patient per day. For acute illnesses or exacerbation of original illness requiring additional visits before or after 5 weeks of hospitalization, claims for extra visits should be made on an independent consideration basis.
- (c) When a patient in hospital is referred by one physician to another, the second physician will not be limited by the Subsequent Hospital Visit formula for the number of hospital visits already rendered by the first physician. In other words, the second physician is entitled to claim for his visits up to five weeks just as if the patient was being attended to in hospital for the first time. However, if the patient is transferred to the care of another physician, the Subsequent Hospital Visit formula would apply just as it would if only one physician was involved in the care.
- (d) When a physician already is in the hospital and is asked to assess one of his own in-patients on a non-emergent or emergent basis, the subsequent hospital visit listings apply. However, if he is asked to assess another physician's patient on an emergent basis, the General Listings should be used.

17. Emergency Department — Physician on Duty Services: include the listings for minor and multiple systems assessment and the specific premiums applicable to these two services. A physician on duty in the Emergency Department regardless of his specialty should submit claims under these listings. A physician who is not on duty in the Emergency Department should use the General Listings when seeing patients in the emergency or out-patient departments. See Appendix C for further guidelines to claiming for services rendered in the Emergency Department.

18. Long-Term Institutional Care: includes the listings for consultations, assessments and other visits to patients in chronic care hospitals, convalescent hospitals, nursing homes and other institutions in which such patients are covered by extended care legislation.

Admission assessments to long term care institutions are classified as —

Type 1 — applies when (a) no medical history has been provided to the admitting physician, (b) the admitting physician takes the history of past and present illness, carries out a general assessment and provides a report for the medical record.

Type 2 — applies when (a) the report of the history and examination has been written by another physician, (b) the admitting physician reviews the report and decides it is necessary to repeat the history and general assessment and provides a report for the medical record.

Type 3 — applies when (a) there is a report of the history and general assessment

PREAMBLE

made by the same (as the admitting) physician prior to admission or, (b) when the admitting physician writes an admission note describing the condition of the resident following admission.

When a physician already is in the institution and is asked to assess one of his own in-patients on a non-emergent or an emergent basis, the subsequent visit listings apply. However, if he is asked to assess another physician's patient or an emergency basis, the General Listings should be used.

19. Visit for Procedure: when the sole reason for an office visit is the performance of a certain procedure, the listed benefit for the procedure will apply. (See Diagnostic and Therapeutic Procedures Preamble for exceptions.) When procedures are carried out in the office, emergency or outpatient department on an elective basis, a special visit should not be claimed in addition to the procedural fee.

When procedure(s) are carried out under the direct supervision of the physician, the usual claims may be made for procedure(s) which are generally and historically accepted as those which may be carried out by the nurse or other medical assistant in the employ of the physician. "Procedures" in this context do not include such services as assessments, consultations, psychotherapy, etc. Direct supervision requires that during the procedure the physician be physically present in the office or clinic at which the service is rendered.** While this does not preclude the physician from being otherwise occupied he should be in personal attendance on enough occasions to ensure that procedures are being performed competently and he must at all times be available immediately to approve, modify or otherwise intervene in a procedure as required in the best interests of the patient.

For physiotherapy procedures performed under direct physician's supervision as detailed above, see Code G467 on Page 101.

20. Premiums:

(a) Special visits —

- (i) A special visit is one which is initiated by the patient or his representative which requires a physician to travel from one location to another to see a patient(s). That is, when the physician is not already in the office, hospital, institution, patient's home, etc. and is called to make a special trip there to attend a patient, a "special visit" premium may be claimed. The premium(s) for a special visit to the office only applies outside of normal office hours but does apply whether or not the office is in the physician's home.
- (ii) The special visit premiums apply only to emergent or non-elective calls and do not apply to non-referred or transferred obstetrics. The premiums do not apply to visits on regular rounds, and admission assessments of patients who have been admitted to hospital, etc. on an elective basis do not qualify as "special visits", regardless of the time performed.
- (iii) If an institution has arranged to have quarters in the same or in a proximal building in order that a physician will be available to make visits to the institution, particularly at night, these are not considered to be "special visits" to the institution.

**Some procedures may not require the physical presence of a physician for adequate supervision. Exceptions to this requirement of direct supervision may be made upon recommendation of the Ontario Medical Association and the College of Physicians and Surgeons of Ontario.

PREAMBLE

When services are rendered on an emergency basis at a site other than listed in this schedule (e.g. roadside, ski slope, etc), the special visit premiums are applicable.

If a physician is called to pronounce a patient dead, a minor assessment may be claimed along with the appropriate surcharge for the special visit.

- (iv) An emergency call with sacrifice of office hours may be claimed in a situation where the demands of the patient and/or the physician's interpretation of the patient's condition is such that the physician responds immediately at the sacrifice of regular office hours.
- (v) A special visit at night or on a Saturday, Sunday or holiday may be claimed when non-elective or emergent calls are made between the hours of 5.00 pm and 7:00 am or are received and made on Saturdays, Sundays and Holidays. "Holidays" are defined for the purpose of this schedule as New Year's Day, Good Friday, Easter Monday, Victoria Day, Dominion Day, Civic Holiday, Labour Day, Thanksgiving, Remembrance Day, Christmas Day and Boxing Day. If any of these holidays fall on a Saturday or Sunday, at the physician's discretion either the Friday before or the Monday following will be recognized as the holiday. When Christmas Day falls on a Saturday or Sunday the Holiday premium (H106 instead of H107) for a physician on duty in the emergency department applies to Christmas Day as well as to the day recognized as the holiday.
- (vi) Only one special visit premium (daytime; sacrifice of office hours; or nights, Saturdays, Sundays and Holidays) may be claimed for the same patient, same visit.
- (vii) The Home Visit premiums apply to emergent or non-elective assessments which are initiated by a call from the patient or his representative. It is recognized, however, that a home visit occasionally may be required because of the patient's medical condition even though the physician has not been called specifically for that visit. For such "elective home visits", the daytime special visit premium B990 is applicable in addition to the appropriate assessment under the General Listings. The Special Visit premiums applicable to nights, Saturdays, Sundays, Holidays or sacrifice of office hours, however, are not appropriate, regardless of the time of the visit.
- (viii) Normally, the "additional patient" premiums are not applicable unless the additional patient himself qualifies for a special visit. Patients who drop in to the office or Emergency Department while the physician is there for reasons other than rendering a special visit at that time do not qualify for any of the special visit premiums. However, extra patients during a home visit or those who drop in to the office or Emergency Department while the physician is there rendering a special visit to another patient also qualify for the "additional patient" premiums if an assessment is rendered.

Extra in-patients seen during a special visit to a hospital or other institution do not qualify for the "additional patient" premiums unless the physician has been asked specifically to see these extra patients as well. (See also paragraph 16(d) above.)

Patients seen during "office hours" held at night or on Saturdays, Sundays or Holidays do not qualify for any of the special visit premiums.

Special Visit Benefits:—(applicable in addition to benefits for services listed under "Consultations and Visits" and "Critical Care") K992, C992, K993, C993 also are applicable to assistant and/or anaesthetist at emergency surgery.

E409 or E410 may not be claimed for procedures which mainly involve the interpretation of test results and are not applicable to assessments or consultations. Neither are they applicable to physicians on duty in the emergency department nor to procedures listed in the Diagnostic Radiology, Nuclear Medicine or Diagnostic Ultrasound sections of the Schedule.

PREAMBLE

- (xviii) Non-elective Nuclear Medicine, Diagnostic Radiology or Diagnostic Ultrasound Examinations.

C109 For special visits at night (5:00 p.m. to midnight) or before midnight, Saturdays, Sundays or Holidays to perform examinations listed in the Nuclear Medicine, Diagnostic Radiology or Diagnostic Ultrasound sections of the Schedule, a premium of \$16.80 may be added to the benefit for the first examination performed on any one patient or may be claimed alone if it is decided that the procedure is not medically indicated and a consultation is not rendered.

C110 For such special visits commencing between midnight and 7:00 a.m., the applicable premium is \$25.20.

- (xix) Assistants' services —

E400B For cases commencing after 5:00 p.m. and before midnight or before midnight on Saturdays, Sundays and Holidays, the total benefit for assistant units (basic and time) is increased by 30%.

- (xx) Anaesthetists' services —

E400C For cases commencing after 5:00 p.m. and before midnight or before midnight on Saturdays, Sundays and Holidays, the total benefit for anaesthetic units (basic and time) is increased by 30%.

E401C For cases commencing after midnight and before 7:00 a.m., the total benefit for anaesthetic units is increased by 40%.

- (b) **Special Care Unit (e.g. I.C.U. or C.C.U.) —**

C101 For visits to patients in Special Care Unit such as I.C.U. or C.C.U. (excluding supportive care), add \$4.20 to charges for all such visits.

21. **Detention:** benefits may be applicable for detention when under very exceptional circumstances a physician is required to spend considerable extra time with a patient. Such extra time must be required at that time, and it must be to the exclusion of all other work.

Claims for detention must be substantiated by an explanation on the claim card or in an accompanying letter, and should be made on an "I.C." basis according to the following guidelines:

After twenty minutes if the physician spends more than this amount of time providing a minor or intermediate assessment or subsequent hospital visit;

After forty minutes if the physician spends more than this amount of time providing a specific or general re-assessment or multiple systems assessment or certification of mental illness;

After one hour if the physician spends more than this amount of time providing a consultation, limited consultation, repeat consultation, prenatal consultation, specific or general assessment.

Detention is not meant to apply to procedures nor to obstetrical care and does not include time waiting for X-rays, lab reports, the operating room or for the patient to arrive for assessment or treatment.

K001 Detention, per quarter hour or part thereof\$10.50

PREAMBLE

K101 Detention, while in attendance with patient(s)
in ambulance, per quarter hour or part thereof\$17.50

Note: K101 is not applicable to attendance in a vehicle other than an Ambulance.

22. Independent Consideration — “I.C.”: independent consideration will be given by O.H.I.P. for those items in the Schedule of Benefits which are listed as I.C.. Claims rendered under this heading must include a specific charge along with a detailed explanation of that charge. Where pertinent, an operative report is very helpful in rendering independent consideration. It also is helpful if I.C. claims include a comparison of the scope and difficulty of the procedure with other specific procedures listed in the Schedule.

23. Transferral and Referral:

(a) A referral takes place when one physician requests for his patient the services of another. The services of the latter may consist of:

(i) an opinion (i.e. a consultation)

(ii) diagnostic tests or procedures (e.g. skin test, biopsy, etc.)

Note: In such cases the referring physician continues to treat the case himself.

(iii) treatment (surgical or medical).

The referring physician's O.H.I.P. registration number must be included on the claim submission.

(b) A transferral, as distinguished from a referral, takes place where the responsibility for the care of the patient is completely transferred permanently or temporarily, from one physician to another in the same field or specialty (e.g. where the first physician is leaving temporarily on holidays and unable to continue to treat the case). The physician to whom the patient is transferred should be regarded as substituting for the other physician and is not entitled to claim for a consultation. Physicians who are substituting for other physicians should consider that patients of the latter have been temporarily transferred (not referred) to their care. Where the care of the patient involves a benefit containing several components such as for surgery or obstetrics the physicians may consider the surgical or obstetrical benefit a team benefit and decide among themselves how each is to be compensated; traditionally physicians in these circumstances have reciprocated by exchanges of coverage for each other. When physicians routinely or frequently substitute for each other providing hospital visits to registered bed patients in active treatment hospitals, e.g. weekend coverage or daily rounds by various members of a group, the most responsible physician may claim for all the visits.

24. Most Responsible Physician: is the attending physician who is primarily responsible for the day to day care of the patient in hospital. In cases of unusual severity where the consultant assumes the role of the most responsible physician, the consultant may claim on a per visit basis and the family physician may claim supportive care. Where the family physician remains the most responsible physician and requests only a consultation, the family physician may claim on a per visit basis and the consultant may claim for a consultation only.

25. Concurrent Care: when the family physician remains the most responsible physician but because of the seriousness or complexity of the condition, requests continued directive

PREAMBLE

care by a consultant, the family physician may claim on a per visit basis. The consultant also may claim on a per visit basis, not to exceed four such claims during the first week and not to exceed two such claims each week thereafter while the patient's condition remains serious — this arrangement being agreeable to both physicians.

26. **Multidisciplinary Care:** applies when the complexity of the medical condition requires the services of several physicians in different disciplines. In such cases, each physician should render a separate claim on a per visit basis. This does not refer to a situation where a single benefit for a team of physicians is listed in the Schedule.

27. **Supportive Care:** is the care rendered in hospital by the referring physician, who is not actively treating the case (e.g. writing orders), to a patient under the care of another physician, at the desire of the patient or family, for purposes of liaison or reassurance. The physician may claim for this care on a per visit basis, not to exceed four such claims during the first week and not to exceed two such claims each week thereafter. If medical complications develop or are present in the post-operative period which require active management by the referring physician, claims for hospital medical care should be rendered, not supportive post-operative care.

28. **Specialist:** a specialist shall be defined (for purposes of application in the case of any given service within this Schedule) as one who holds a certificate from the Royal College of Physicians and Surgeons of Canada in the specialty which normally is considered to encompass the service in question.

A specialist rendering services outside of his specialty should use the codes and tariffs listed in the General Practice section of the Schedule

29. **Differential Benefits:**

- (a) Where only one benefit is listed, it shall apply to any physician rendering the service, regardless of specialty.
- (b) Consultation and visit benefit listings under the heading of Family Practice and Practice in general may be claimed by other branches of medicine if the listings do not appear elsewhere in the Schedule.
- (c) Specialists in paediatrics who practice allergy may claim specialist rates for their allergy services regardless of the age of their patients.

30. **Referring Physician's Services:**

- (a) For the services rendered prior to an operation, the referring physician should claim on a "fee-for-service basis", for example:
 - (i) Home, Office or Hospital Visits as rendered.
 - (ii) In addition to (i) above, in acute cases, benefits may be claimed for detention if applicable and appropriate (refer to paragraph 21, above).
- (b)
 - (i) For services rendered as an assistant during the operation, the referring physician should claim in accordance with paragraph 32, below.
 - (ii) In cases in which the referring physician is required to be present in the interest of the patient but does not actually assist at the surgical procedure, he should claim a hospital visit for this service.

PREAMBLE

- (c) For the services rendered after the operation, the referring physician may claim on the basis of supportive care as outlined in the Schedule.

31. Pre-dental Assessment:

A physician, regardless of specialty, who is required to examine a patient in preparation for dental surgery under general anaesthesia may claim \$18.20 when he has seen the patient in the previous twelve months for a general assessment or \$27.30 if he has not seen the patient within the previous twelve months for a general assessment. If the examining physician also administers the anaesthetic only \$18.20 may be claimed in addition to the anaesthetic benefit, for the history and examination required by the hospital on admission (this is an exception to paragraph 33(a)).

32. Assistants' Services:

- (a) Time units are computed by allowing one unit (\$5.60) for each 15 minutes or part thereof of time (up to two hours) spent by the assistant. Time units for assistants' services for periods in excess of two hours per case are computed by allowing two units for each 15 minutes or part thereof. Time for purposes of these calculations includes scrub time and time spent in the operating room. If claims are being made in coded form (see Preamble, part B, paragraph 14), the suffix B should be added to the code for the procedure.
- (b) The basic units should be listed separately from the time units on the claim card. Benefits for assistants' services are determined by multiplying the listed basic units and the time units by \$5.60. For cases commencing after 5:00 p.m. and before midnight or before midnight on Saturdays, Sundays and Holidays, the total benefit for assistant units (basic and time) is increased by 30% (**E400B**). For cases commencing after midnight and before 7:00 a.m., the total benefit for assistant units is increased by 40% (**E401B**).
- (c) When multiple or bilateral surgical procedures are done during the same anaesthetic, the assistant's benefits shall be based on the basic units for the major procedure plus time. When bilateral procedures or surgical revisions are carried out at separate times with separate anaesthetics, the assistant shall be entitled to receive full assistant's benefits for each procedure.
- (d) In surgical procedures requiring more than one assistant, benefits for the second assistant shall be computed on the same basis as for the first assistant.
- (e) When a surgeon requires an assistant at a procedure for which no assistant's units are listed, the assistant may calculate the total benefits applicable by taking the number of basic units used by the anaesthetist, adding his time units and multiplying the total number of units by \$5.60. (See also (f) below.)
- (f) When assistants at surgery claim for procedures for which no assistants' units have actually been listed in the Schedule, the assistants should support their claims with letters of explanation as to why their attendance was required.
- (g) Where the attendance of a physician is requested by the patient's other medical attendants for the sole purpose of monitoring or special supportive care, and when the

PREAMBLE

physician is in constant attendance, the benefits shall be based upon 3 units plus time (E003B).

- (h) When an anaesthetic has begun and the operation is cancelled prior to commencement of surgery, the assistant who has scrubbed but is not required to do more, should claim 3 basic units plus time units (E006B). If the operation is cancelled after surgery has commenced, the procedural basic unit plus time units will apply. If the procedure is cancelled prior to the induction of anaesthesia and the assistant is scrubbed, a subsequent hospital visit only may be claimed.

33. Anaesthetists' Services:

- (a) Benefits for anaesthetists' services are for all types of anaesthesia. The rates listed are for professional services, including pre-anaesthetic evaluation and post-anaesthetic follow-up and all immediate supportive measures, and does not include the cost of materials used. If an anaesthetist is asked to see a registered bed patient in consultation more than 36 hours prior to the administration of an anaesthetic, he may claim for a consultation as well as for rendering the anaesthetic. If an anaesthetist examines a patient prior to surgery and the surgery is cancelled prior to the induction of anaesthesia, he may claim a subsequent hospital visit for this service. When an anaesthetic has begun and the operation is cancelled due to a complication prior to the commencement of surgery, the anaesthetist should claim 4 basic units plus time (E006C). If the operation is cancelled after surgery has commenced, the procedural basic units plus time units will apply.
- (b) Basic units are listed for most procedures and include the value of all anaesthetic services except the actual time spent administering the anaesthesia, any modifying factors, or unusual detention with the patient (see paragraph 33(k, l,) below).
- (c) Except during maintenance of continuous conduction anaesthesia (G247 pg 97, P015 pg 108), time units are computed by allowing one unit for each 15 minutes or part thereof of anaesthesia time (up to two hours). Following the first two hours of anaesthesia, time units for periods in excess of two hours are computed by allowing two units for each 15 minutes or part thereof. Anaesthesia time begins when the anaesthetist is first in attendance with the patient for the purposes of creating the anaesthetic state and ends when he is no longer in personal attendance (when the patient may be safely placed under customary post-operative supervision).
- (d) Anaesthesia time units may not be claimed by the same anaesthetist for rendering anaesthesia or other time-reimbursed services to more than one patient at the same time.
- (e) Time units and listed basic units should be indicated separately on the claim card. Benefits for anaesthetists' services are determined by multiplying the basic and the time units by \$6.37 for certified anaesthetists and \$5.88 for non-certified anaesthetists. For cases commencing after 5:00 p.m. and before midnight or before midnight on Saturdays, Sundays and Holidays, the total benefit for anaesthetic units (basic and time) is increased by 30% (E400C). For cases commencing after midnight and before 7:00 a.m., the total benefit for anaesthetic units is increased by 40% (E401C).

PREAMBLE

If claims are being made in coded form (see Preamble, part B, paragraph 14) the suffix C should be added to the code for the procedure.

- (f) In special cases where the anaesthetic services of more than one anaesthetist are deemed necessary in the interest of the patient the benefits shall be increased by 50% of that computed for the procedure; each anaesthetist to be entitled to one half of the total benefit.
- (g) When multiple or bilateral surgical procedures are done during the same anaesthetic, the anaesthetic benefits shall be based upon the basic units for the major procedure plus time. When bilateral procedures or surgical revisions are carried out at separate times with separate anaesthetics, the anaesthetist shall be entitled to receive full anaesthetic benefits for each procedure.
- (h) In procedures where no units are listed or with I.C., the basic units will be based upon those listed for a comparable procedure considering region and modifying conditions or techniques.
- (i) When a pump with or without an oxygenator and with or without hypothermia is employed in conjunction with an anaesthetic, the anaesthetic "Basic" will be 28 units; this replaces the listed basic units for the procedure. To compensate for variations in anaesthetic practice, special respiratory intensive care or detention for the purpose of intensive treatment of other types may be claimed separately under the appropriate headings.
- (j) An additional 10 units may be claimed when, in association with anaesthesia, "controlled hypotension" is carried out using any technique to deliberately lower and maintain the mean blood pressure at least 25% below the range or normal for that patient. The extra 10 units may be claimed under code **E004C**.
- (k) When unusual detention with the patient before or after anaesthesia is essential for the safety and welfare of such patient, the necessary time will be valued on the same basis as indicated for the anaesthetic time.
- (l) For detention not associated with anaesthesia detention rates and criteria apply (see paragraph 21 above).
- (m) When the attendance of the anaesthetist is requested by the patient's other medical attendants for the purpose of monitoring or special supportive care, and when the anaesthetist is in constant attendance the benefits shall be based upon 3 units plus time. If claims are coded, the code is **E003C**.
- (n) No additional claim should be made for introducing a catheter for continuous conduction anaesthesia, i.e. above the basic of 5 units plus maintenance units to a maximum of 6 units plus the number of time units required for the obstetrical delivery.
- (o) When a physician administers an anaesthetic and/or other medication prior to or during a procedure(s) and also performs a procedure(s) on the same patient, he should claim for the procedure(s) only.
- (p) When hypothermia is used by the anaesthetist in procedures not specifically identified as requiring hypothermia, the basic value is 25 units. This basic value replaces the basic value listed in the Schedule for the procedure. When the basic value claimed is 25 units, the anaesthetic service may be claimed under code **E002C**.

PREAMBLE

- (q) When one anaesthetist starts a procedure and is replaced by another part way through a surgical procedure or delivery, the first anaesthetist should claim the appropriate basic units plus time units and the second anaesthetist may claim for time units only. The second anaesthetist should use code **E005C** for such time units except in the case of continuous conduction anaesthesia for which code G247 or code P015 (plus E100C pertain (see also paragraphs 33(c) and 33(n), above), E005C qualifies for the surcharge E400C or E401C only if the case originally started within the time stated under paragraph 33(e) above. Each anaesthetist should state on his claim card which part of the anaesthetic is being claimed and the time begun and completed.
- (r) General anaesthesia for the purposes of this Schedule includes all forms of anaesthesia except local infiltration.

PREAMBLE**APPENDIX C****“EMERGENCY DEPARTMENT” CLAIMS****PHYSICIAN ON DUTY**

The listings under the heading “Emergency Department—Physician on Duty” are meant to apply only to those circumstances wherein either casualty officers or other physicians are required to be physically and continuously present in the Emergency Department for an arranged designated period of time. When the Physician on Duty is required to remain at the hospital, the special call surcharge will not apply. Use the “Emergency Department—Physician on Duty” listings for all physicians regardless of specialty.

When a ‘casualty officer’ is required to make a special visit to the Emergency Department prior to or after his regular arranged designated period of time on duty, he may claim the appropriate benefit under the General Listings plus the applicable special visit premium for the first patient assessed; all subsequent patients assessed during this visit to the hospital should be claimed under the Emergency Department—Physician on Duty listings.

When a physician is on duty in the Emergency Department, sees a patient and admits the patient to hospital, this physician may claim a minor or multiple systems assessment depending upon the service initially provided. Either the patient’s attending physician or the emergency department physician (but not both) may render and claim the hospital “admission assessment”. If the emergency department physician instead of the attending physician provides the admission general assessment, he may claim a general re-assessment (C004) as well as the initial assessment provided that both services are rendered separately.

SPECIAL VISIT TO EMERGENCY OR O.P.D.**Consultation**

1. Consultation, patient not admitted:
The benefit for the consultation (or repeat consultation) plus the appropriate special visit surcharge (K99-) may be claimed.
2. Consultation, patient admitted:
 - (a) The benefit for the consultation (or repeat consultation) plus the appropriate special visit surcharge (K99-) followed by hospital visits (if rendered) may be claimed. However, if the consultant also is the “most responsible physician”, he may not also claim a hospital in-patient consultation, repeat consultation, general or specific assessment, general or specific reassessment since the initial consultation rendered in the emergency department serves as the admission history and examination.
 - (b) If the consultant is not also the most responsible physician, the latter may claim the appropriate admission assessment.

PREAMBLE

Assessment:

1. **Assessment, patient not admitted —**
The benefit for the assessment (or re-assessment) plus the appropriate special visit surcharge (K99-) may be claimed.
2. **General/specific assessment plus patient admission —**
The benefit for the general or specific assessment plus the appropriate special visit surcharge (K99-) followed by hospital visits may be claimed. However, the admitting physician may not also claim a hospital in-patient general/specific assessment or reassessment since the initial general/specific assessment rendered in the emergency department serves as the admission history and examination.
3. **Minor/intermediate assessment plus patient admission —**
The benefit for the minor or intermediate assessment plus the appropriate special visit surcharge (K99-) may be claimed. In addition, the admitting physician may claim for a hospital in-patient general or specific reassessment if rendered.

Procedure:

Except for procedures for which the listed benefits specifically include the associated consultation or other assessment, claims may be made for both the procedure and the assessment.

Note:

If a physician has an office in the hospital and is called to assess a patient in the Emergency Department or O.P.D., the special visit premiums do not apply.

PREAMBLE**APPENDIX D**

1. Surgery to alleviate significant physical symptoms or to restore or improve function to any area altered by disease, trauma or congenital deformity normally is a benefit under The Ontario Health Insurance Plan. Surgery solely to alter or restore appearance is not a benefit of OHIP except under the circumstances as listed in the following policy.
2. Emotional, psychological or psychiatric grounds are not considered sufficient reason for OHIP coverage of surgery for alteration of appearance except under exceptional circumstances. On request of the attending physician, exceptions may be made on an independent consideration basis if the proposed surgery is to alter a significant defect in appearance caused by disease, trauma or congenital deformity, *and* if the surgery is
 - recommended by a Mental Health Facility (as designated by The Mental Hospitals Act) or equivalent, or
 - recommended by a Correctional Institution, or
 - essential in order to obtain employment as documented by the attending physician *and* either by a Canada Manpower Employment Centre or by an employer with regard to a specific job, or
 - performed on a patient who is less than 18 years of age and the defect is in area of the body which normally and usually would not be clothed.
3. In establishing this policy, it has been recognized that
 - peer acceptance in our society often is influenced disproportionately by the facies,
 - children are especially susceptible to emotional trauma caused by physical appearances,
 - some procedures traditionally have been accepted as benefits of Health Insurance Plans in spite of the obvious cosmetic nature of these procedures.
4. Surgery to revise or remove features of physical appearance which are familial in nature is not a benefit of OHIP.
5. Within the context of this policy, the word “disease” does not include the normal sequelae of aging. Surgery to alter changes in appearance caused by aging is not a benefit of OHIP.
6. Within the context of this policy, the word “trauma” includes trauma due to treatment such as surgery, radiation, etc.
7. The phrase “reasonable period of convalescence” admittedly is imprecise, but it does not seem reasonable to set a definite time interval of convalescence following each procedure. Independent consideration will be given to the questionable cases.
8. Authorization from OHIP is not required for all surgery to alter appearance. It is required only for those categories of procedures for which some cases may not be a benefit under OHIP policy.

PREAMBLE

Surface Pathology

1. Trauma Scars

(a) Neck or Face

- Includes ears and non-hair bearing areas of the scalp.
- Repair of all such scars is a benefit of OHIP.
- Repair procedures will depend upon the lesion but may include excision, revision, dermabrasion, etc. Rhytidectomy procedures to remove scar prominence, however, are not a benefit of OHIP.
- OHIP authorization for repair of such scars is not required but manual assessment of the claims will be necessary to ensure that the most appropriate procedure codes are used.

(b) Scars in other Anatomical Areas

- Repair of scars which interfere with function or which are significantly symptomatic (pain, local irritation, etc.) is a benefit of OHIP.
- Scars with no significant symptoms or functional interference
 - (i) Repair is a benefit if such repair is part of a pre-planned post-traumatic (including post-surgical) staged process. OHIP notification must be included as part of the planning process.
 - (ii) Other post-traumatic scar revision is not a benefit of OHIP.
- OHIP authorization is required for all scar repair procedures in areas other than the face or neck.

2. Keloids

(a) Head or Neck

- The repair of all such keloids is a benefit of OHIP.
- Repair procedures may include excision and/or injection.
- Although no pre-authorization is needed, claims for excision of keloids are assessed manually to ensure that the most appropriate code is used.

(b) Excision of keloids in other areas

- Not a benefit of OHIP unless significantly symptomatic or there is functional impairment.
- OHIP authorization is required.

3. Tattoos

(a) Face or Neck

- Excision or destruction of all such tattoos is a benefit of OHIP.
- Authorization is not required but adjudication of repair procedures will be identical to that for scars in these areas.

(b) Other Anatomical Areas

- Excision or destruction of concentration camp or P.O.W. tattoos is a benefit of OHIP. Otherwise, normally not a benefit of OHIP.

PREAMBLE**4. Benign lesions such as naevi, keratoses, spider naevi, papillomata, neurofibromata****(a) Face or Neck**

- Excision or destruction of these lesions is a benefit of OHIP.
- Authorization is not required.

(b) Other Anatomical Areas

- Normally not a benefit of OHIP if removed for alteration of appearance, only, rather than for medical necessity or because of clinical suspicion or evidence of malignancy.
- Removal of very large lesions in patients less than 18 years of age is a benefit of OHIP.
- Authorization is not required but a statement of the reason for removal must accompany the claim.

5. Hair Loss**(a) Head or Neck****(i) Patients less than 18 years of age**

- Repair is a benefit for non-hereditary etiologies.
- Authorization is not required. However, if it is possible that a planned staged procedure will extend beyond the age limit, pre-authorization should be obtained, since it will be necessary after the 18th birthday.

(ii) Post-traumatic

- Repair to the area of traumatic hair loss is a benefit of OHIP only if carried out within a reasonable period of convalescence.
- OHIP authorization is required.

(iii) Other Etiology

- Not a benefit of OHIP.

(iv) Usual repair procedures may include skin shifts or flaps, skin grafts, or hair plugs.**(b) Other Anatomical Areas**

- Not a benefit of OHIP.

6. Epilation of Hair**(a) Face**

- This procedure is a benefit of OHIP only for those patients with documented endocrine abnormality or drug-induced hirsutism.

(b) Other Anatomical Areas

- Not a benefit of OHIP.

(c) — OHIP authorization is required.

PREAMBLE

7. Redundant Skin

- (a) Excision of redundant skin for elimination of wrinkles, etc. is not a benefit of OHIP.
- (b) Blepharoplasty is not a benefit of OHIP unless there is documented evidence of medical necessity such as visual field defect caused by the redundant eyelid skin.
- (c) OHIP authorization is required.

Sub-Surface Pathology

1. Congenital deformities

(a) Head or Neck

- Repair is a benefit of OHIP except for:
 - surgery to revise or remove features which are familial in nature.
 - surgery to correct “outstanding ears” in patients who are eighteen years of age or over.
- Authorization is not required but manual assessment of the claims will be necessary to ensure that the most appropriate procedural codes are used.

(b) Other Anatomical Areas

- Normally not a benefit of OHIP if surgery is for alteration of appearance only.

2. Post-Traumatic Deformities

- Reconstructive procedures are a benefit at the acute stage; within a reasonable period of convalescence; or if part of a pre-planned staged process of repair.
- Repair of procedures may include bone revision, tissue shifts and grafts, prosthesis implantation, etc.
- OHIP authorization is required for repairs beyond the acute stage.

3. Deformities resulting from local disease

(such as loss or distortion of bone, muscle, connective tissue, adipose tissue, etc.)

(a) Head or Neck

- Reconstructive procedures for significant abnormalities are a benefit at the acute stage; during a chronic disease process; within a reasonable period of convalescence; or if part of a planned staged process of repair initiated during one of these periods.
- Repair procedures normally could include tissue grafts, flaps or shifts, bone revision, prosthesis insertion, etc.
- Face lifts, modified face lifts, brow lifts, etc. are not a benefit of the Plan if skin, only, is involved in the procedure. However, a repair such as ptosis repair or face lift with underlying slings is a benefit of OHIP if the procedure is to correct significant deformity following stroke, cancer, VIIth nerve palsy, etc.
- OHIP authorization is required for repair of deformities resulting from local disease.

PREAMBLE

(b) Other Anatomical Areas

— Not a benefit of OHIP if the correction is for appearance, only.

4. **Breast Surgery**

(a) Augmentation Mammoplasty

— This procedure is a benefit of OHIP unilaterally or bilaterally for a female patient with breast aplasia.

— It is an OHIP benefit unilaterally for a female patient with a severely hypoplastic breast when the other breast is not also hypoplastic.

— A “balancing” augmentation mammoplasty may be allowed on an independent consideration basis for correction of unilateral hypoplasia when performed in association with approved contralateral reduction mammoplasty.

— The correct code for the repair procedure is R112.

— OHIP authorization is required.

(b) Post-Mastectomy Reconstruction

— Unilateral or bilateral breast reconstruction is a benefit of OHIP when the procedure is subsequent to, as listed in the Schedule of Benefits, total or partial mastectomy (including wedge resection) or prophylactic mastectomy.

— Authorization is not required but all claims are manually assessed to determine the benefit appropriate to the procedure rendered.

(c) Reduction Mammoplasty

— This procedure is a benefit for female patients only, and only when there is significant associated symptomatology such as intertrigo, neck or back pain or shoulder grooving.

— A “balancing” reduction mammoplasty of the contralateral breast may be allowed as an OHIP benefit when performed in association with approved unilateral augmentation mammoplasty or post-mastectomy reconstruction.

— Ptosis and/or size are not sufficient grounds for OHIP coverage of reduction mammoplasty

— OHIP authorization is required.

(d) Male Mastectomy

— This procedure is a benefit of the Plan.

— The appropriate code for the procedure is R115 or R116.

— Authorization is not required.

(e) Accessory breasts or accessory nipples

— Excision of such accessory tissue is a benefit of the Plan.

— The appropriate code should be used from the Schedule listings under Skin and Subcutaneous tissue.

— Authorization is not required.

5. **Excision of excess fatty tissue**

— This is a benefit of the Plan only if there is significant associated symptomatology such as intertrigo, pain or excoriations.

PREAMBLE

- When performed for alteration of appearance, the removal of redundant skin, alone, from the abdomen, extremities, etc. is not a benefit of the Plan.
- OHIP authorization is required.

Sex-Reassignment Surgery

- (1) Sex-reassignment surgical procedures are a benefit of OHIP only if they are performed on patients who have completed the Gender Identity Clinic program operated by the Clarke Institute of Psychiatry in Toronto. Moreover, claims are accepted for payment only for those patients for whom the Clinic has recommended that surgery take place. This surgery need not take place in Toronto or even in Ontario. Surgery recommended by the Clinic which takes place outside the Province of Ontario may be approved for payment at rates in accordance with the current OHIP Schedule of Benefits.
- (2) Within the foregoing guidelines, reconstruction of genitalia and mastectomy are benefits of the Plan. However, since the hormonal treatments associated with sex-reassignment themselves give rise to breast enlargement, augmentation mammoplasty or breast reconstruction in a male to female conversion normally would not be a benefit of OHIP, in keeping with the previously outlined policy regarding breast surgery in females.
- (3) OHIP authorization is required.

Complications and/or Revisions

- (1) The treatment of acute medical or surgical complications resulting from surgery for alteration of appearance and/or function is a benefit of the Plan whether or not the original surgery was covered by OHIP. This includes complications resulting from trans-sexual surgery (such as breakdown of the artificial vaginal wall). No authorization is required.
- (2) Revision of surgery for alteration of appearance, because of undesirable results, is a benefit of the Plan if the original surgery was a benefit *and* if the revision either is part of a pre-planned staged process or occurs within a reasonable period of convalescence. Correction of the effects on appearance which are due to complications, is a benefit of the Plan if it is carried out within a reasonable period of convalescence. OHIP authorization is required only if the original surgical procedure, if it had been carried out at the time of the proposed revision, would have required such authorization. For example, authorization would not be required for revision in a 16-year-old of a repaired congenital ear deformity. However, if the child is 18 years or older at the time of the revision, authorization would be required.

NUCLEAR MEDICINE — IN VIVO

Column T — is the technical benefit for the production of records, radiopharmaceutical agents, apparatus, premises, technical services, administration and secretarial services.

Column P₁ — is the professional benefit for supervision of the procedure, appropriate patient interview and/or examination, correlation of related data, interpretation of results, and provision of a written report. The physician must be present for supervision of the procedure to the extent that he or she may intervene personally, if required.

Column P₂ — is the professional benefit for interpretation of results and provision of a written report. If the physician is not present or if any visit is claimed in conjunction with that Nuclear Medicine procedure, the lesser professional benefit (P₂) should be claimed.

Notes: (1) The total benefit is arrived at by adding T plus P₁ (first code listed, e.g. Z006) or by adding T plus P₂ (second code listed, e.g. Z925).

When coding the total benefit use suffix A

When coding the technical portion only use suffix B

When coding the professional portion only use suffix C.

(2) If quantification or data manipulation is carried out in addition to visual inspection of imaging studies, add 30% to the appropriate professional benefit. Such activity must add significant diagnostic information not available by inspection alone and does not include simple image enhancement techniques such as smoothing, background subtraction, etc. Recording of images on videotape for replay and production of images on the video display of a computer do not in themselves justify the additional benefit.

For services for which this additional 30% is appropriate the correct code prefix is Y instead of Z. For example for Arteriography plus data manipulation, the appropriate codes are Y006/Y925 instead of Z006/Z925.

The benefits for cardiac wall motion studies and calculation of ventricular ejection fraction (Z010 and Z012) already include an allowance for data manipulation and no additional benefit may be claimed.

(3) If examination of Brain, Lung, Liver or Spleen is limited to one view, the benefit (T and P₁ and P₂) is to be reduced by 50% (use codes Z036/Z957, Z041/Z935, Z080/Z990 respectively).

(4) Repeat studies on the same day may be claimed only after exercise or drug intervention.

(5) The phrase “nuclear medicine specialist” should be interpreted as “nuclear medicine physician”, since not all physicians practising nuclear medicine are certified as specialists in this discipline by the Royal College of Physicians and Surgeons.

(6) See also Preamble, part B, paragraph 1(i), 1(j) and 1(k).

CLINICAL PROCEDURES ASSOCIATED
WITH DIAGNOSTIC NUCLEAR
MEDICINE PROCEDURES

Such procedural benefits are intended for the professional service of placing an instrument or introducing diagnostic radiopharmaceuticals. They are not intended to be used for simple subcutaneous, intramuscular or intravenous injection nor for oral administration. Rather than double listing the procedures and benefits in this part of the schedule, physicians are directed to the following reference points in the schedule.

- (a) Intravenous injection for peripheral venography — G376 or G379 on page 96.
- (b) Intra-articular injections — G370 on page 95.
- (c) Injection into CSF spaces or shunt apparatus — Z821 on page 213.
- (d) Arterial puncture — G479 on page 86.

RADIATION ONCOLOGY (THERAPEUTIC RADIOLOGY)

Code **RADIOTHERAPY** (including Therapeutic Isotopes) **\$**

The listed benefits are for the professional services of a certified therapeutic radiologist, the services of a specialist for the intracavitary or interstitial application of radium or sealed sources and the services of a specialist using non-sealed sources of radioisotopes in a laboratory authorized by the Atomic Energy Control Board of Canada. Other medical services to the patient are not included in these figures. The cost of material is additional.

TELERADIO THERAPY

Note: Paid only to a certified therapeutic radiologist, (Spec. code 34).
The fee for all inpatient services is a hospital charge.

X304	Minor teleradiotherapy — x-ray, 150 KVP or less — charge per treatment visit	5.95

Note: For minor teleradiotherapy administered by other than certified therapeutic radiologists, use the listing under Diagnostic and Therapeutic Procedures.

RADIATION ONCOLOGY (THERAPEUTIC RADIOLOGY)

Code	RADIOISOTOPES (non-sealed sources)	\$
Note:	The following benefits include treatment planning, dosage calculation and preparation of materials. Appropriate visit and procedural benefits (e.g. paracentesis) may be claimed in addition. Thyroid and prostate benefits (X327, X335, X336) include administrations within any three month period.

X336	Prostate malignancy	42.00
X327	Hyperthyroidism	42.00

DIAGNOSTIC RADIOLOGY

Column T — The benefit for radiological examination including the production of radiographs, supplying of contrast media, apparatus; premises, technical services, administration and collection costs.

Column P — The benefit for consultation between radiologist and referring physician, fluoroscopy, interpretation of radiographs and fluoroscopic findings and supervision of x-ray services by a radiologist.

Notes and Interpretations:

1. Private offices and hospital outpatient departments will claim the sum of Columns T plus P.

2. Radiologists should use Column P as a guideline for negotiating remuneration with hospitals.

3. Benefits for clinical procedures related to x-ray examination are listed in the following section, or under Diagnostic and Therapeutic or Surgical Procedures. "Clinical Procedures", in this context, are those by which contrast media are introduced, except oral or rectal administration for study of the alimentary tract, and intravenous injections, which are an integral part of the study, performed by the physician collecting the benefit for the procedure.

4. If less than the minimum number of views are performed, reduce listed benefits by 25% (this reduction applies to both technical and professional component). If more than the minimum number of views are performed, no further benefit is applicable unless specifically listed.

5. If the examinations which are requested by the referring physician yield abnormal findings or if they would yield information which in the opinion of the radiologist would be insufficient, governed by the needs of the patient and the requirements of the referring physician, the radiologist may add further views and claim for them (if listed).

6. Claims for X-ray services, when referred by an Osteopath, Chiropractor or Chiropractor to a private X-ray facility are not benefits of O.H.I.P.

7. Claims for X-ray services, when referred by an Osteopath or Chiropractor to a hospital outpatient department are benefits.

8. Coding

- When coding the total benefit use suffix A.
- When coding the technical portion only use suffix B.
- When coding the professional portion only use suffix C.
- When coding claims from certified radiologists (33) use the listed codes (i.e. X001-X191) plus the appropriate suffix.
- When coding claims from non-certified radiologists increase the first numerical digit in the listed codes by 5 (i.e. X501-X691) plus the appropriate suffix.

DIAGNOSTIC RADIOLOGY

9. When a radiologist is asked to x-ray one extremity only, no additional claim should be made for comparison x-rays initiated by the radiologist.

10. Nephrotomography is covered by the listings for intravenous pyelogram and planigram.

11. A stereo pair is to be counted as two views.

12. No extra claim should be made for rapid sequence I.V.P.

13. No additional claim is warranted for the use of the image intensifier in diagnostic radiology.

14. Fluoroscopy claims should not be submitted for any examination performed by the radiologist where "fluoroscopy" is generally regarded as an integral part of the examination, e.g. examinations of the G.I. tract, urinary tract, special procedures.

15. "Colon — air contrast" may be claimed when performed according to generally accepted criteria. The colon should be scrupulously prepared. Five to eight full size views of the abdomen should be obtained after fluoroscopically controlled introduction of air and barium.

16. "Oesophagus, stomach and duodenum, double contrast" presupposes the introduction of gas, the use of antifoam agent and a suitable barium mixture.

17. Abdomen and chest studies should not be routinely done and claimed in gastrointestinal examinations.

18. Three or more views of the chest should not be done routinely and claimed when a chest examination is requested.

19. Chest studies should not be routinely done and claimed in mammography cases.

20. Nasal bones or accessory nasal sinuses should not be routinely claimed in skull examination requests.

21. Abdomen and/or pelvis should not be routinely claimed in lumbar spine examination requests.

22. A survey film of the abdomen is a single view. The ordering of additional films should be left to the discretion of the radiologist who should determine which examination is adequate for a specific patient. Obviously, if progress of a long tube is being followed, a survey film is sufficient. If, however, an intestinal obstruction is being followed, a single film is usually inadequate.

23. Conventional films of the spine should not be routinely done and claimed before myelography. The necessity of having plain film studies of the spine prior to interpreting the myelographic studies is obvious. It is not essential, however, that these be done at the institution where the myelogram was done. If they had been done at an outside office, then it is a matter for the radiologist and the referring physician to have the films available. If they cannot be made available to the radiologist, it is an acceptable practice for him to do the required examination of these areas and to claim for them so that they may be available for interpretation along with the myelographic study.

24. Pharynx and oesophagus (cine or videotape) — X106 should not be claimed routinely with X108 and X109 but only when specifically indicated.

DIAGNOSTIC RADIOLOGY

25. Lumbar or lumbrosacral spine (X028, X205, X206) does not include the entire sacrum. However, an examination of the sacrum may be carried out and claimed only when specifically indicated.

26. The listed benefits apply to unilateral examinations except for central structures or as otherwise specified.

CLINICAL PROCEDURES ASSOCIATED WITH DIAGNOSTIC RADIOLOGICAL EXAMINATIONS

- Note:**
1. These procedural benefits are intended to cover compensation for the professional service of placing an instrument and, if done, of introducing contrast media (except oral or rectal administration for study of the alimentary tract). Injection of materials to enhance the effect of contrast media is included in the procedure benefits.
 2. Radiological charges are additional: see similar entries under section on RADIOLOGY.
 3. Where similar procedures are done for diagnostic physiological studies of non-radiological nature, e.g. cardiac catheterization or intra-arterial infusion, they are listed separately under Surgery or Diagnostic and Therapeutic Procedures. See Index.

Column T — The benefit for testing including supplying of equipment, premises and technical services.

Column P — The benefit for professional services including responsibility for quality control and technician training, interpretation of the results of the tests, and consultation between the physician responsible for the tests and the referring physician concerning the results of the tests.

- Notes:**
- (1) The total benefit is obtained by adding columns T and P together.
 - (2) Coding: When coding the total benefit, use suffix A.
When coding the technical portion only, use suffix B.
When coding the professional portion only, use suffix C.
 - (3) The benefits for simple spirometry and standard lung mechanics represent the best of three recorded tests results with or without bronchodilator.
 - (4) The following tests are considered to be specific and require the individual ordering notation for each test parameter.

- Notes:**
- (1) T and P Columns should be interpreted in the spirit of the first two paragraphs on page 63, but without limiting the performance of these tests to physicians of any one specialty.
 - (2) The total benefit is obtained by adding columns T and P together.
 - (3) Coding: When coding the total benefit, use suffix A.
When coding the technical portion only, use suffix B.
When coding the professional portion only, use suffix C.
 - (4) A-Mode — implies a one-dimensional ultrasonic measurement procedure.
 - (5) M-Mode — implies a one-dimensional ultrasonic measurement procedure with movement of the trace to record amplitude and velocity of moving echo-producing structures.
 - (6) Scan B-Mode — implies a two-dimensional ultrasonic scanning procedure with a two-dimensional display.
 - (7) All ultrasound examinations include a permanent record and interpretation.

DIAGNOSTIC AND THERAPEUTIC PROCEDURES

- Code** With a few exceptions specifically indicated below, the listed procedural benefits are for the procedure(s) alone.
- Consultations or visits when such services are rendered, may be claimed in addition to the procedure(s).
- G700** When a procedure(s) is the sole reason for a visit, add \$3.15 per patient visit for those procedures marked (+) regardless of the number of procedures carried out during that visit. However, if the visit is to a diagnostic facility controlled directly or indirectly by a physician who has examined and referred the patient to such a diagnostic facility on the same day, G700 may not be claimed under these circumstances.

Note: G700 is not payable to a hospital department.

Schedule Interpretations:

1. If in the course of any office or home visit (see Preamble, Part B), a haemoglobin screen and/or haematocrit (any method or instrument) is carried out, code G481 may be claimed for this service (see page 86). Urinalysis may be claimed with or without an associated visit to a physician's office, except for screening and urinalyses which are not medically necessary (see Preamble, part A, paragraph (2)).

2. Claims for apex cardiography and E.C.G. may be made when both services are rendered.

3. For the first minor teleradiotherapy procedure rendered to a patient, the physician may claim the appropriate consultation or assessment in addition to the procedure(s). On subsequent visits, only minor teleradiotherapy plus \$3.15 should be claimed unless additional procedures have been performed or unless there has been a complication or change to a totally unrelated diagnosis. In the first exception, minor teleradiotherapy plus the benefit(s) for additional procedures may be claimed. In the second exception, the appropriate assessment and minor teleradiotherapy may be charged.

4. If, in addition to the allergy injection, the patient requires a minor assessment only of his allergic condition, the physician may claim for code G212 only. However, if a patient requires a more complete assessment of his condition or if a patient presents for an allergy injection and has an acute infectious condition, albeit of the respiratory system, or some other unrelated condition any of which would have otherwise required a separate office visit, the physician is entitled to claim for the appropriate assessment as well as the injection.

5. The benefits for respiratory care on pages 91, 92 of the Schedule under Physician-in-Charge apply per patient treated, i.e., while the physician-in-charge may change during the course of treatment, the benefit formula as set out should be used by the physicians involved as if there were only one physician-in-charge during the treatment program.

6. The \$4.70 benefit under Physical Medicine Therapeutic Procedures means one \$4.70 per hour, per patient regardless of the number of procedures carried out during the hour.

7. Multiple B.C.G. inoculations used for treatment of carcinoma are to be considered experimental and no claims should be made for this service.

DIAGNOSTIC AND THERAPEUTIC PROCEDURES

8. Some benefits for Diagnostic and Therapeutic Procedures have the technical and professional components listed separately. However, when only one benefit is listed for a service, it represents the professional component only. The technical component includes the salaries of support staff, equipment depreciation or lease costs, supplies and costs associated with the preparation of a written report. The professional component includes the clinical supervision of the diagnostic facility, interpretation of the test results and a written report.

9. The Preamble applicable to Surgical Procedures also applies, where appropriate, to Diagnostic and Therapeutic Procedures.

OBSTETRICS

1. Obstetrical care includes a complete history and physical examination, routine prenatal visits, care during labour, delivery, post partum care and post-natal office visit.

2. The listings under Divided Care are to be used when more than one physician is providing different components of obstetrical care to the same patient. If an obstetrical patient is referred to a consultant for obstetrical care because of the complexity, obscurity or seriousness of the case, the consultant may claim a consultation in addition to the appropriate obstetrical benefit listed under "Divided Care." If an uncomplicated obstetrical patient is transferred from a family physician to an obstetrician for obstetrical care, no consultation or assessment should be claimed since this is not a referral. If the consultant is called by the family physician at the time of delivery and performs only a minor part of the delivery (eg: re-application of forceps, confirmation of position), he should claim a consultation only and the family physician should claim for the delivery. However, if the consultant performs a major portion of the delivery (eg: forceps rotation), he rather than the family physician should claim for the delivery. In this instance, the family physician may claim for the other listed services which he actually provides.

Attendance at labour and attendance at delivery is applicable when rendered if a physician refers an obstetrical patient to a consultant for obstetrical care because of complications but does not apply when a patient is transferred for normal care.

3. When a patient visits a physician for a diagnosis of pregnancy and subsequently attends another physician for full obstetrical care, up to two diagnostic visits may be allowed to the first physician without any reduction of the total benefit for the second physician. Where obstetrical care is divided by transferral between two physicians, the prenatal component of the benefits applicable to each physician shall be allowed on a "fee-for-service" basis provided that neither physician's claim individually exceeds the benefit for prenatal care.

4. Illnesses resulting from or associated with pregnancy or false labour requiring added home or hospital care should be claimed on a per visit basis.

5. When a pregnant patient visits her physician for a condition related to her pregnancy (e.g. anaemia, backache, fatigue), or for an unrelated condition assessed during routine prenatal care, visit benefits should not be claimed in addition to the obstetrical care. However, a special visit may be allowed when rendered for episodes related to pregnancy but of a very serious nature (e.g. toxemia, pre-eclampsia, bleeding) if such visit leads immediately to hospitalization of the patient because of the serious nature of the complication.

6. The listings under the heading Referred Services may be claimed by consultants in addition to the appropriate consultation or visit. They may not be claimed by physicians providing total obstetrical care to their own patients and they may not be claimed in addition to the services listed under "Divided Care."

7. If a consultant is requested by another physician to perform a surgical induction of labour or emergency removal of Shirodkar sutures (except at delivery), he may claim a consultation for these service(s).

8. Medical induction or stimulation of labour may not be claimed by more than one physician for the same induction and may only be claimed *once per pregnancy* by any one physician and only when carried out for recognized obstetrical complications and does not qualify for detention.

OBSTETRICS

9. Ordinary immediate care of the newborn is included in the obstetrical benefit and, when the service is rendered by the anaesthetist, it is included in the anaesthetic benefit. Active resuscitation of the newborn provided by any physician may be claimed under codes G521, G522 (Life Threatening Emergency Situation). When this service is rendered by an anaesthetist during the administration of anaesthetic, the time claimed must be deducted from the total anaesthetic time.

10. When a physician provides newborn care and also performs a circumcision on the same newborn or infant, both services may be claimed.

11. When an obstetrician routinely *transfers* all newborns to the care of a paediatrician, the latter should not claim consultation benefits for these “transferrals”. If the baby is well, the paediatrician may claim the newborn care in hospital benefit of \$32.90 plus \$35.00 for code H267 (page 51), attendance at maternal delivery (if this service is given). If the baby is sick, such paediatrician may claim for a general assessment and for attendance at maternal delivery (if this service is given) plus daily visits for as long as the paediatrician’s services are required. If an obstetrician normally cares for newborns himself or transfers the care of newborns to a general or family physician but refers a perinate to a paediatrician because of the complexity, obscurity or seriousness of the case, the latter may claim for his service according to the following guidelines:

- (a) if a pre-natal consultation is performed, code C665 may be claimed on the mother’s card (see Preamble, Part B, paragraph 1(1)).
- (b) if attendance at maternal delivery is rendered, code H267 may be claimed and, if a general assessment of the baby is carried out, code C263 may be claimed as well. However a post-natal consultation on the baby (C265) may not be claimed in addition to H267.
- (c) If the paediatrician has not attended the delivery, a post-natal consultation may be claimed (if this service is rendered) even though a pre-natal consultation may already have been claimed.

12. When a physician provides prenatal care, attends at labour, assists or administers the anaesthetic at Caesarian Section (or other operative delivery) and visits the patient post-operatively, he is entitled to claim for prenatal care, attendance at labour and attendance at delivery, assistant’s or anaesthetist’s benefits for Caesarian Section, (or anaesthetist’s benefits for other operative delivery) and supportive care while the patient is in hospital.

13. If a foetus is aborted at less than 20 weeks gestational age, codes P001, P005, P006, etc. are not applicable. “Visit fees” should be claimed instead.

14. The Preamble applicable to Surgical Procedures also applies, where appropriate, to Obstetrics.

SURGICAL PROCEDURES

Preamble:

FOR DEFINITION OF THE ROLE OF THE REFERRING PHYSICIAN, SEE REFERRING PHYSICIAN SERVICES ON PAGE 12.

FOR DEFINITION OF THE ROLES OF THE ANAESTHETIST, SEE ANAESTHETIST SERVICES ON PAGE 13.

- (1) The surgical benefit (except for fractures or dislocations requiring no reduction and other procedures either marked "I.O.P." or including complete care) includes hospital visits rendered by the surgeon two days prior to surgery, the operative procedure, the post-operative care usually associated with the procedure(s) rendered by the surgeon while the patient is in hospital, and one office visit for follow-up examination, if necessary. If the surgeon is required to provide listed services not usually associated with the procedure(s), he may claim for these. If special visits to hospital are required and rendered, the surgeon may claim the appropriate special visit premium even if the basic hospital visits are not chargeable.

The surgical benefit as noted above no longer includes the major pre-operative visit (e.g. consultation, general assessment, etc.) at which the decision to operate is made, regardless of the time interval between the major pre-operative visit and the surgery. The hospital or day-surgery admission assessment (consultation, repeat consultation, general assessment or re-assessment, specific assessment or re-assessment) may not be claimed by the surgeon unless it happens also to be the major pre-operative visit as defined above. Visits rendered prior to admission (excluding admission assessments) and hospital visits (minor assessments) rendered prior to two days before the surgery may be claimed in addition to the surgical benefit. For patients remaining in hospital because of complications, visit benefits may be claimed in addition to the surgical benefit after the second post-operative week. The starting point for calculating the appropriate number of hospital visits allowed in accordance with the Schedule after the second post-operative week is the date of admission if the operating surgeon has admitted the patient or the date of referral if the patient has been referred to the operating surgeon while in hospital.

The listed surgical benefit includes the generally accepted surgical components of the procedure. The listed benefit of a procedure normally also includes any necessary repair of iatrogenic damage occurring during the course of the surgery.

- (2) When a physician makes a special trip to perform a non-elective surgical procedure during the daytime (Monday to Friday), he may claim the appropriate special visit, a consultation if the case is referred (except for fractures or dislocations requiring no reduction) or the appropriate assessment if the case is not referred plus the procedural benefit(s). When the special visit is to deal with fractures or dislocations requiring no reduction, a minor assessment is the appropriate benefit to be added to the special visit and fracture or dislocation benefits. If the non-elective procedure is carried out at night (after 5:00 p.m. and before 7:00 a.m.), or Saturdays, Sundays and Holidays, the physician may claim a special visit if applicable and the surgical premium **E409** or **E410** (see Preamble, Part B, paragraph 20).
- (3) When more than one operative procedure (non-I.O.P.) is performed by the same surgeon at the same time and/or under the same anaesthetic or during the same hospitalization for the same condition, the benefit shall be the full benefit for the major procedure plus 85% of the listed benefit(s) for additional procedures, unless otherwise indicated in the Schedule and except where such combined operations are independently specified as items in

SURGICAL PROCEDURES

this Schedule. This paragraph applies to staged procedures and to each side of bilateral procedures, but does not apply in the case where a normal appendix or simple ovarian or para-ovarian cyst is removed incidentally during an operation, for which no charge should be made (see also OHIP Bulletin #4122, July 3, 1979).

- (4) When a subsequent operation(s) becomes necessary for the same condition because of a complication, the full benefit will apply for each procedure.
- (5) When a subsequent non-elective operation(s) is performed for a new condition, the full benefit will apply for each procedure.

When a subsequent elective procedure is done for a different condition during the same hospitalization, the benefit for the lesser procedure shall be reduced by 15% unless performed by another surgeon in which case the full benefit will apply.

- (6) When different operative procedures are done by two different surgeons under the same anaesthesia for different conditions, the benefit will be 100% of the listed benefit for each condition. Under these circumstances, the basic assistants' units should not be claimed by either operating surgeon; however time units may be charged when appropriate.
- (7) As a general rule, when elective bilateral procedures are performed by two surgeons at the same time, one surgeon should claim for the surgical procedures and the other surgeon should claim the assistant's benefit.
- (8) Where two surgeons are working together in surgery in which neither a team benefit or other method of claiming is set out in the schedule, the surgeon should identify himself as the operating surgeon and claim accordingly; the surgeon who is assisting him should identify himself as such and claim the assistant's benefit. Where the second or assistant surgeon is brought into the case on a consultation basis, he may, when indicated, claim a consultation as well but should be prepared to justify it on an I.C. basis. If the nature or complexity of a procedure requires more than one operating surgeon each providing a separate service in his own specialized field, each surgeon may claim the full listed benefit for the procedure he performs. This, however, does not apply to those cases wherein an additional surgeon(s) is involved simply because he may be more skillful at carrying out a procedure which the first surgeon normally should be able to do. Neither does it apply to those cases wherein one or more additional surgeons perform components of a main procedure for which there is a listed combined tariff. For the latter two circumstances, the first portion of this paragraph pertains and the additional surgeon(s) may claim assistant's benefits only, along with consultation and visits if appropriate. If a surgeon, in addition to performing a specialized portion of the procedure, acts as an assistant during the remainder of the procedure, he may also claim time units (but not basic units) for assisting.
- (9) Unless otherwise stated, the listed procedural benefits are for unilateral procedures.
- (10) When a procedure is performed, a procedural benefit, if listed, should be claimed. Substitution of consultation and/or visit benefits for procedural benefits (except as in paragraph 11), is not in keeping with the intent of the schedule.
- (11) For fractures and dislocations requiring no reduction and for other procedures which include complete care, when the listed benefit is less than the consultation benefit and the case is referred, the physician may claim for the consultation instead of the surgical benefit. However, to avoid the consultation being counted as such under the OHIP limi-

SURGICAL PROCEDURES

tation rules on the number of consultations allowed per year, the physician should claim for the consultation under the surgical procedure nomenclature or code. Since the consultation is replacing a procedural benefit which includes the pre- and post-operative and surgical care, no additional claims beyond the consultation should be made.

- (12) If a physician performs a minor surgical procedure and during the same visit assesses and treats the patient for another completely unrelated and significant problem involving another body system, the physician may claim for the procedure as well as for the appropriate assessment.
- (13) Where a procedure is specified as "Independent Operative Procedure (I.O.P.)", the procedural benefit may be claimed in full. In addition, visit benefits, consultations etc. may be claimed when such services are actually rendered. When an I.O.P. procedure is done in conjunction with non-I.O.P. procedure(s), no claim may be made for the consultation, pre- and post-operative care related to the I.O.P. procedure. The listed I.O.P. benefit may be claimed in these circumstances along with the benefits for the non-I.O.P. procedure(s) and the related major pre-operative visit in accordance with paragraph (1) of this Preamble. When multiple or bilateral I.O.P. procedures are performed at the same time by the same physician, the listed procedural benefits may be claimed in full but the pre- and post-operative benefits should be claimed as if only one procedure had been performed.
- (14) When procedures are specifically listed under Surgical Procedures, physicians should use these listings rather than applying one of the plastic surgery benefits listed under operations on skin and subcutaneous tissue.
- (15) For excision of tumours not specifically listed in this Schedule, claims should be made on an I.C. basis (code **R993**). Independent consideration also will be given (under code **R990**) to claims for other unusual but generally accepted surgical procedures which are not listed specifically in the Schedule (excluding non-major variations of listed procedures). In submitting claims, physicians should relate the service rendered to comparable listed procedures in terms of time and difficulty (see Preamble, Part B, paragraph 22).
Independent consideration also will be given (under code **R991**) to out-of-Province claims for generally accepted surgical procedures which are not available in Ontario, for which a patient has been referred by an Ontario physician and for which prior approval from OHIP has been obtained.
- (16) Cosmetic or Aesthetic Surgery: means a service to enhance appearance without being medically necessary such as surgery for correction of facial wrinkles, surgery for eyelid wrinkles (symmetrical and without a functional problem), rhinoplasty for appearances only, etc. These services are not benefits of OHIP. (See Preamble, Appendix A).
- (17) Reconstructive Surgery: is surgery to restore normal appearance and function to any area altered by disease, trauma or congenital deformity. Although surgery solely to restore appearance may be included in this definition under certain limited conditions, emotional, psychological or psychiatric grounds normally are not considered sufficient additional reason for OHIP coverage of such surgery.

Appendix D of the Preamble to this Schedule describes the conditions under which surgery for alteration of appearance, only, may be a benefit of the Plan.

Physicians should submit requests to their District OHIP office for authorization of any

SURGICAL PROCEDURES

proposed surgery which may fall outside of OHIP coverage. Among those procedures for which requests *must* be submitted before the procedure is performed are:

- (a) augmentation mammoplasty (excluding post-mastectomy breast reconstruction)
- (b) blepharoplasty
- (c) dermabrasion (excluding face and neck)
- (d) epilation of hair
- (e) face lift
- (f) hair transplant
- (g) panniculectomy, lipectomy
- (h) reduction mammoplasty
- (i) rhinoplasty or septorhinoplasty
- (j) scar revision (excluding face and neck)
- (k) sex-reassignment surgery
- (l) tattoo removal (excluding face and neck)

Requests for authorization of proposed surgery should identify the medical necessity of the surgery. Moreover, since it is the procedure for which the authorization request is being made, it must be adequately described and accurately related to the condition it is intended to alleviate.

Note that when a surgical procedure is not a benefit of the Plan, the associated anaesthetist's charges, assistant's charges and hospital costs normally also are excluded from OHIP coverage.

- (18) Procedural benefits (non I.O.P.) include the removal of sutures where both services are rendered by the same physician unless the removal of sutures is done after one office visit for follow up examination has already been provided. If sutures are removed subsequent to the first post-operative office visit, or if they are removed by a physician other than the operating surgeon, or following an I.O.P. procedure, "visit fees" apply.
- (19) Additional claims for biopsies performed when a surgeon is operating in the abdominal or thoracic cavity may be given independent consideration.
- (20) When a procedure is performed for which only "local anaesthetic" and/or "general anaesthetic" listings appear, and an anaesthetic is not required, the procedure should be claimed under the "local anaesthetic" listing. When a physician administers an anaesthetic and/or other medication prior to or during a procedure(s) and also performs a procedure(s) on the same patient, he should claim for the procedure(s) only.
- (21) If claims are being submitted in coded form, the surgeon should add the suffix A to the listed procedural code, the surgical assistant should add the suffix B to the listed procedural code and the anaesthetist should add the suffix C to the listed procedural code.

	(d) Lacerations involving components of both (b) and (c)		\$40.20	
	(e) Lacerations requiring extensive debridement, add 50%.			
	(f) A combination of 2 or 3 lacerations falling within the foregoing guidelines would require individual assessment of each laceration. e.g.: for the suturing of a 6 cm scalp laceration requiring tying off bleeders and/or layer closure, a 3 cm cheek laceration and 1 cm laceration through the mucocutaneous border of the lip, the benefit claimed could be calculated as follows:			
	Scalp (d)		\$40.20	
	Cheek (Z176)		8.05	
	Lip (c)		20.10	
	Total (Z178)		\$68.35	
	(plus the appropriate consultation and visit benefits)			
	(g) More complicated lacerations should be compared in scope and difficulty with other similar services which have definitive benefits listed in the Schedule.			
	3. In every case, claims for Z178 should be accompanied by sufficient description of the procedure rendered and an explanation of the charges submitted (<i>see Preamble, Part B, paragraph 22</i>).			
	Suture of muscle laceration			
R525	— simple muscle repair(s) to include repair of involved skin	3	52.50	4
R528	— complex muscle repair (see Preamble, Part B, paragraph 22)	3	I.C.	6

Flaps and Grafts

- Notes:**
- (1) The benefit will depend on the size and location of the area grafted and the type of graft.
 - (2) Additional procedures other than the skin grafting are extra, e.g. tendon grafts, inlay grafts, etc.
 - (3) Skin grafts or pedicle flaps done during a procedure should be claimed for on their own merit (unless specifically listed as being inclusive for that procedure).

SURGICAL PROCEDURES**Preamble**

- (1) Except for application of cast brace, no claim should be made for application of plaster if applied at the time of any surgery. The benefits for the treatment of fractures and/or dislocations also include initial and subsequent application of cast(s) (see also Fracture Preamble, paragraphs (e), (1)). However, if plaster is applied under any other circumstances, the claims for application of plaster should be made in accordance with the schedule listings on page 127.
- (2) Corrective splints must be "corrective" to qualify for benefits. The corrective splint listings are not applicable to simple immobilization such as with a Jones bandage or a metal finger splint following soft tissue injury.
- (3) The removal of a wire or pin or other device when used for traction or external fixation in the treatment of a fracture or other orthopaedic procedure is to be included in the procedural benefit. Removal of devices used for internal fixation may be charged for in addition to the procedural benefit.
- (4) The benefit for total hip replacement also includes denervation of the hip joint and adductor or abductor tenotomy.
- (5) When closed irrigation is instituted in a bony cavity, soft tissues or joint during a surgical procedure, add \$40.60 (E550).
- (6) When a bone graft is required (except for listings in which bone grafting is included in the benefit and except for fusions and management of pseudarthrosis) in the course of an operative procedure (including treatment of fractures) add \$50.40 (E551) if autogenous bone is taken through a separate incision; add \$40.60 (E552) if autogenous bone is taken through the same incision, and add \$20.30 (E553) if homogenous bone is used.
- (7) If methylmethacralate is required for internal fixation in the course of an operative procedure (with the exception of insertion of prostheses and cranioplasties), add \$50.40 (E547).
- (8) When a fascial graft is required in the course of an operative procedure, add \$20.30 (E557).
- (9) When an allo-graft is obtained, the applicable benefit will be 85% of that listed for excision of the appropriate bone (R218).
- (10) Cost of materials is not a benefit of OHIP.

SURGICAL PROCEDURES**OPERATIONS ON THE MUSCULOSKELETAL SYSTEM****FRACTURES AND DISLOCATIONS****Preamble**

- (a) OPEN REDUCTION shall mean the reduction of a fracture or dislocation by an operative procedure to include the exposure of the fracture or dislocation and intramedullary, internal or external means of skeletal fixation.
- (b) CLOSED REDUCTION shall mean the reduction of a fracture or dislocation by non-operative methods (to include skin traction or K wire or Steinmann's pin for balanced traction.)
- (c) FOR CLOSED REDUCTION of a fracture or dislocation with external skeletal or Roger Anderson type apparatus, the closed reduction benefit plus 40% (E555) may be claimed. If percutaneous pinning is used, the surcharge is 30% (E569).
- (d) NO REDUCTION shall mean the treatment of a fracture or dislocation by any method other than that designated in (a), (b), or (c) above.
- (e) The listed benefits for fractures or dislocations requiring no reduction include the major pre-operative visit. For fractures or dislocations requiring reduction, the major pre-operative visit (e.g. consultation, general assessment, etc.) may be claimed in addition to the listed benefits for reductions.
The stated benefit is to cover full treatment by the physician claiming that benefit, including initial and subsequent application of cast(s) and necessary after care up to 2 months (includes Therapeutic Procedures under G467), except as in (g) and (h) following.
- (f) For combinations of fractures, dislocations, and/or surgical procedures (non I.O.P.), the benefit for the major fracture, dislocation or procedure shall be 100%, and the benefit for other fractures, dislocations and/or surgical procedures shall be 85% of the full listed benefit.
- (g) In cases where two or more reductions (closed or open) are performed on different occasions for one fracture or dislocation by one or more surgeons; the full benefit should be claimed for the final reduction and after care. Previous attempted reduction(s) by the same physician should be claimed at 75% of the full listed benefit(s) for that reduction.
- (h) When a patient is transferred from an acute care hospital to a chronic or convalescent facility, additional benefits on a chronic care basis shall be allowed to other than the operating surgeon. These benefits shall be based on the chronic care schedule.
- (i) Compound fractures or dislocations, requiring extensive debridement — 50% over the benefit for reduction (E556).
- (j) If reconstructive procedures on soft tissues are required, such services should be claimed on their own merit.
If bone grafts are used in open reduction of a fracture, paragraph (6) of the Preamble to the musculoskeletal system applies.
- (k) When a patient is transferred to another surgeon for after care of a fracture or dislocation treated by no reduction or closed reduction, except for emergency splinting (see para-

SURGICAL PROCEDURES**OPERATIONS ON THE MUSCULOSKELETAL SYSTEM**

graph (l), below) the surgeon rendering the initial care should claim 75% of the listed benefit and the surgeon rendering the subsequent care 75% except where otherwise specified. In cases involving open reduction, the percentages should be 80% and 75% respectively. Paragraph (11) of the Preamble to Surgical Procedures also applies.

- (l) The benefit for emergency splinting of a fracture in the emergency department should be on the basis of the emergency room visit or the special visit to the hospital, whichever applies, plus application of cast if rendered and if consistent with other portions of this preamble.
- (m) In the case of fractures or dislocations or minor avulsion fractures not requiring reduction, visit benefits (use a fracture diagnosis) shall apply unless a specific benefit is listed. For fractures listed at "visit fees", the following also apply:
 - (1) When two or more fractures, *each* listed at "visit fees", are treated, only one visit benefit should be claimed for each visit, even though more than one fracture is assessed, treated, or re-assessed.
 - (2) When fractures or other procedures which are listed at "visit fees" are treated along with treatment of fractures which have definite benefits listed, visit benefits should not be claimed in addition to claims for other fracture care.
 - (3) When fractures or other procedures which are listed at "visit fees" are treated along with the performance of non-IOP surgery, visit benefits should not be claimed in addition to claims for the surgery.
 - (4) For the combinations described in items (2) and (3) above, visit benefits are appropriate for follow-up care of the fractures listed at "visit fees" only for visits which, because of these fractures, are required in addition to the usual after-care of the other fractures or other surgery.
- (n) In case of fractures or fracture dislocations with associated paraplegia, hospital visit benefits may be charged in addition to the surgical benefit after two weeks of post-operative care.
- (o) The removal of a wire or pin or other device when used for traction or external fixation in the treatment of a fracture or other orthopaedic procedure is to be included in the procedural benefit. Removal of devices used for internal fixation may be charged for in addition to the procedural benefit.

O. Reg. 332/81, s. 7 (Sched. 15).

8. Schedule 16 to the said Regulation, as remade by section 6 of Ontario Regulation 120/80 and amended by section 2 of Ontario Regulation 315/80 and section 2 of Ontario Regulation 987/80, is revoked and the following substituted therefor:

SCHEDULE 16

LABORATORY MEDICINE

Note: Claims for laboratory services, when referred by a Dentist, Osteopath, Chiropracist or Chiropractor are not insured services.

PREAMBLE:

1. The patient documentation and specimen handling benefit is applicable to all patients, except for those items listed under the anatomical pathology, histology and cytology sections. The items in this section have been left as a sufficient level to cover administrative costs. This benefit is not applicable to referred-in samples, since the collecting laboratory will already have claimed the patient documentation and specimen collection benefit.
2. The biochemistry section has been condensed so that one listing refers to a procedure for any of amniotic fluid (A), blood (B), C.S.F. (C), faeces (F), gastrointestinal fluid (G), urine (U). Exceptions are indicated by B, U, etc., following the test name. Other specimens will be considered on an I.C. basis.
3. A number of tests are listed in different sections of the schedule, i.e. when more than one method of performing the test is available, e.g. Aminophylline is listed under both Biochemistry and Radioassays. Assays of ligand type other than radioisotopic are listed under Biochemistry.
4. Blood glucose by the dipstick method may be claimed only when assessed by an appropriate instrument such as a reflectance meter. It should not be claimed when used only as a check on the fasting blood sample of a glucose tolerance test. The blood glucose of the fasting sample in a glucose tolerance test is allowable only once even if assessed by two methods.

Note: The glucose tolerance test (G.T.T.) is not listed in this Schedule. Therefore, when requesting a laboratory to perform a glucose tolerance test, the physician should specify the number and frequency of blood sugar determinations and urinalyses desired. Unless such specifications are given, laboratories should carry out the "standard" 3 hour glucose tolerance test of 5 blood glucoses and 5 urine glucoses (See OHIP Bulletin #4124, July 13, 1979). Ketones should not be routinely claimed with G.T.T.

5. Code L418 or L417 may not be claimed by a physician in addition to claim(s) for any treatment or assessment. However, Code G481 (see page 86 of the 1981 OHIP Schedule of Benefits) may be claimed by a physician if a haemoglobin screen (any method or instrument) is carried out in the course of an office or home visit. Urinalysis may be claimed with or without an associated visit to a physician's office (except for screening and urinalyses which are not medically necessary).
6. When a screening culture method (e.g. Agar spoon) is used on a urine sample, L641 refers to a culture technique and does not apply to those kits using the nitrite test only. Where a significant growth is obtained and followed up by definitive identification methods, L633 or L634 only should be claimed. The benefits for L633 and L634 include any necessary microscopic examination of the urine.
7. The Physician assumes responsibility for all cytology smears and the professional benefits (L804 to L815 inclusive, and L826) listed in the section on Diagnostic and Therapeutic Procedures in the OHIP Schedule of Benefits are weighted averages of the professional component. These benefits, therefore, are applicable in each case whether or not all slides are examined by the physician.

LABORATORY MEDICINE

8. Only those tests which are requested are to be claimed with the following exceptions. It is intended that if the test results yield abnormal findings or information which would be incomplete, insufficient or meaningless to the referring physician, the medical director of a laboratory may add further appropriate tests and claim for them with the knowledge he may have to substantiate their justification.
9. A test must be completed in accordance with the pertinent Schedule listing in order to charge for it. The verbatim listing is intended as the definitive benefit for that test alone, unless otherwise specified e.g. isoenzymes do not include total enzyme estimations: creatine does include creatinine (as specified). Notwithstanding the foregoing and recognizing that it is impossible to list all variations in techniques of all listed tests, when there is a modification of the usual technique, the listing most closely approximating it should be used.
10. This schedule, with the exception of L036, lists actual procedures performed. No claim shall be made for calculated values made and reported, or for control tests or repeat tests on the same patient sample.
11. The benefit for seminal fluid examination (complete) is to include sperm count, volume estimation, motility and morphology and viscosity. The benefit for seminal fluid examination carried out post-vasectomy is not to be claimed by the operating surgeon unless the patient requires more than one office visit post-operatively.
12. Creatinine is a justifiable addition in the case of tests on 24-hour urine samples, where it is necessary to assess the sample as a complete 24-hour collection. However, if several tests (e.g. steroids) are done on a single such sample, only one creatinine should be claimed for that sample. In those estimations where the test result is expressed in terms of creatinine excretion (i.e. a certain quantity per m.g. of creatinine) the performance of a creatinine is mandatory and may be claimed).
13. It is recognized that in requests for a serologic titre, if a screening test is used and would suffice, the lesser benefit for the screening test should be claimed. If positive and followed by a serial titration, both the screening and titre fees may be claimed. If the titration is a micro technique using plates, it is the equivalent of a tube titre, the wells being miniature tubes.
14. When a test for trichomonas identification (any method) is carried out in association with L625 or L627, code L653 may be claimed in addition. L653 also may be claimed when Wet Preparation is used for direct examination of a fresh specimen for vegetative amoebae or similar parasites. However, the wet preparation used in the faeces concentration technique for parasites and ova is included in L650.
The conditions set down in paragraph 8 of this preamble must be adhered to.
15. It is recognized that in all laboratory tests there is a professional component.
16. The maximum number of units which may be claimed for any combination of L418 (Hemoglobin), L417 (Hematocrit); L399 (WBC Count) and L397 (RBC Count) is 11 LMS units, whether automated, semi-automated or manual methods are used. L700 is not included in this total and may be claimed separately, if appropriate. Code L470 has been deleted from this schedule. Laboratories using multichannel equipment and previously claiming under Code L470 should now use individual codes as described above.
17. The maximum number of units which may be claimed for any combination of the tests represented by the following codes will be 40 LMS units per patient visit per day:

LABORATORY MEDICINE

L005	L061	L194	L223	L252
L030	L067	L204	L225	
L045	L111	L208	L226	
L053	L191	L222	L251	

This maximum of 40 units applies on a per patient basis, regardless of the number of specimens submitted and regardless of the number of laboratories involved in performing the individual tests. Code L700 is not included in this maximum and should be claimed separately, if appropriate.

18. The maximum number of units which may be claimed for any combination of chemical analyses performed on a single sample by means of an automated chemical analyzer with simultaneously functioning channels is 18 LMS units (L225).
19. The definitions and guidelines in this paragraph apply to the Blood Bank section of Laboratory Medicine:
 - (a) L471 Antibody Identification — incomplete antibodies. A panel of any number of cells regardless of suspending media or technique used. Preparation of eluate and/or antibody absorption is included.
 - (b) L472 Antibody Identification — complete antibodies. A panel of any number of cells for the identification of complete antibodies by direct agglutination.
 - (c) L473 Parallel Titration — to be used when two sequential patient serum specimens are tested to detect a change in antibody titre. Includes a repeat antibody identification on the current sample.
 - (d) L490 Blood Group — ABO and Rh_o(D). The subgroups of A and RhD^u are included where indicated. A direct AHGT is also included in L490, therefore, L495 may not be charged on the same patient when this code is claimed.
 - (e) L492 Crossmatch. When an initial crossmatch is requested the appropriate claim is for L490 x 1, L482 x 1 plus L492 for each unit ordered. L490 and L482 may not be claimed more than once on the same day of service. L490 and L493 may not be claimed when these procedures are carried out as a confirmatory test on the units of blood to be transfused.
 - (f) L493. This listing includes L490 (see (d), above) and Rh genotype to include the antigens C, D, E, c, e, and D^u when indicated. Any other antigen is to be claimed under L494.
 - (g) L494 Blood Group per antigen. Antigens stated in L493 and L490 are excluded from this listing.
 - (h) L495 Direct AHGT. This listing may be claimed when ordered as a single procedure or in addition to L482 when the latter is requested as a single procedure. L495 may not be claimed when L490 or L493 is claimed with L482 on the same patient on the same visit.
20. Antibiotic sensitivities should not be done routinely, but only when, by reason of its identification and/or its concentration, the isolated organism has a high probability of being pathogenic.
21. The use of Nickersons Medium as a screening test for yeast is not a benefit.
22. The carcinoembryonic antigen test (CEA) L690 is not to be used as a general cancer screen. It is to be used only for following established malignancies.
23. This preamble is intended to apply to everyone using codes L700 and L001 to L724 in the

LABORATORY MEDICINE

Laboratory Medicine Schedule and codes L800 to L828 listed in the section on Diagnostic and Therapeutic Procedures in the O.H.I.P. Schedule of Benefits.

- 24. The benefits for patient documentation and specimen collection and each test are calculated by multiplying the individual L.M.S. Unit values by 40.8¢.
- 25. Laboratory tests on specimens sent outside Ontario are not a benefit of the Plan.
